MASTER’S REPORT

All water right claims that appeared in the Preliminary Decree for Sun River (Basin 41K) were subject to “issue remarks” resulting from pre-decree examination by the DNRC, objections, and counterobjections. Claim 41K 200368-00 received an issue remark during the DNRC’s review of the claims.

The claim was consolidated into Case 41K-0501-R-2024 and an Order Setting Filing Deadline was issued by the Water Court requesting any additional information needed to resolve the issue remark.

FINDINGS OF FACT

1. Claim 41K 200368-00 received the following substantive issue remark:
THE CLAIMED FLOW RATE EXCEEDS THE 35 GPM GUIDELINE FOR THIS PURPOSE AND CANNOT BE CONFIRMED DUE TO LACK OF DATA.

2. Currently, the flow rate listed on the Statement of Claim for claim 41K 200368-00 is 40.00 gpm.

3. On February 8, 2024, the Water Court issued an Order Setting Filing Deadline with the following language regarding the above-listed issue remark:
ORDERED that the Claimant review this order and, *if necessary*, file a statement denoting that the flow rate of claim 41K 200368-00 should be modified as described in the above-listed issue remark by **Wednesday, March 20, 2024**. *If nothing is filed by the deadline, this Master will conclude that the Claimant agrees that the flow rate of claim 41K 200368-00 is historically accurate as listed on the Statement of Claim, no modification will be made, and the issue remark will be removed from the claim.*

PRINCIPLES OF LAW

1. Section 85-2-248(2), MCA, requires that the Water Court resolve all issue remarks that are not resolved through the objection process. *See also* Rule 7, W.R.Adj.R.

2. A properly filed Statement of Claim for an existing water right is prima facie proof of its content. Section 85-2-227, MCA; Rule 10, W.R.Adj.R.

3. A preponderance of the evidence is evidence that shows a fact is “more probable than not.” *Hohenlohe v. State*, 2010 MT 203, ¶ 33, 357 Mont. 438, 240 P.3d 628.

4. If prima facie status is overcome, the burden shifts back to the claimant to demonstrate historical use. *79 Ranch v. Pitsch*, 204 Mont. 426, 432-33, 666 P.2d 215, 218 (1983).

CONCLUSIONS OF LAW

1. The information in the record resolves the issue remark appearing on claim 41K 200368-00. Because nothing was filed at the filing deadline by the Claimants, and the DNRC did not provide sufficient information supporting the issue remark, the issue remark does not overcome the prima facie status afforded the Statement of Claim for

claim 41K 200368-00, the flow rate should remain as it appears on the abstract, and the issue remark should be removed from the claim.

RECOMMENDATIONS

Based on the foregoing Findings of Fact and Conclusions of Law, this Water Master recommends that the Court remove the issue remark from claim 41K 200368-00.

A post decree abstract of the water right claim reflecting the removal of the issue remark is attached to this Report.
