NOTICE OF FILING OF MASTER'S REPORT

This Master's Report was filed with the Montana Water Court on the above stamped date. Please review this report carefully.

You may file a written objection to this Master's Report within **10 days** of the stamped date if you disagree or find errors with the Master's findings of fact, conclusion of law, or recommendations. Rule 23, W.R.Adj.R. If the Master's Report was mailed to you, the Montana Rules of Civil Procedure allow an additional 3 days be added to the 10-day objection period. Rule 6(d), M.R.Civ.P. If you file an objection, you must serve a copy of the objection to all parties on the service list found at the end of the Master's Report. The original objection and a certificate of mailing to all parties on the service list must be filed with the Water Court.

If you do not file a timely objection, the Water Court will conclude that you agree with the content of this Master's Report.

MASTER'S REPORT

Water Right Claim 39F 31774-00 appeared in the Preliminary Decree for the Little Missouri River, above Little Beaver Creek (Basin 39F). The claim received an issue remark. Issue remarks result from Department of Natural Resources and Conservation

(“DNRC”) claims examination or by Water Court order. Claims examination confirms the historical use of water right claims and identifies issues with claims. If claims examination cannot confirm some aspect of a claim, an issue remark is added to the claim. The claim did not receive any objections or notices of intent to appear.

The Court consolidated this claim into Water Court Case 39F-0123-R-2021 on August 27, 2021. The Court requested through the consolidation order that Claimants file information resolving the issue remark.

Claimants did not file anything by the filing deadline.

FINDINGS OF FACT

1. Claim 39F 31774-00 appeared with an issue remark indicating the DNRC could not confirm the existence of the claimed reservoir with available data.

2. The Court requested information regarding the existence or location of the claimed reservoir.

3. Claimants did not file any responsive information.

4. The issue remark should be removed from the above-captioned claim.

APPLICABLE LAW

1. A properly filed statement of claim is prima facie proof of its content. Section 85-2-227, MCA. The prima facie status of a claim may be overcome by a preponderance of the evidence. Section 85-2-227, MCA; Rule 19, W.R.Adj.R. A preponderance of the evidence is evidence that shows a fact is “more probable than not.” *Hohenlohe v. State*, 2010 MT 203, ¶ 33, 357 Mont. 438, 240 P.3d 628.

2. The Water Court must weigh an issue remark, and the information resulting in that issue remark, against the claimed water right. Section 85-2-247(2), MCA.

3. The Water Court must resolve all issue remarks not resolved through the objection process. Section 85-2-248, MCA. The Court must review information in the claim file or obtained by the Court to determine if there is a sufficient basis to resolve the remarks. 85-2-248(3), MCA.

CONCLUSIONS OF LAW

1. The above-captioned claim may be decreed without modifications because the issue remark does not overcome the prima facie status of the claim.

2. The evidence in the record provides the Court with a sufficient basis to resolve and remove the issue remark from the above-captioned claim.

RECOMMENDATIONS

Based upon the above Findings of Fact and Conclusions of Law, this Master recommends that the Court make the changes specified in the Findings of Fact to correct the Preliminary Decree for this Basin. A Post-decree Abstract of Water Right Claim is served with this Report to confirm the recommended changes have been made in the state's centralized record system.
