

IN THE WATER COURT OF THE STATE OF MONTANA
YELLOWSTONE DIVISION
LITTLE MISSOURI RIVER BASIN ABOVE LITTLE BEAVER CREEK (39F)
PRELIMINARY DECREE

* * * * *

CLAIMANTS: Ray Marchant; Sharon Marchant

CASE 39F-0130-R-2021
39F 175930-00

NOTICE OF FILING OF MASTER'S REPORT

This Master's Report was filed with the Montana Water Court on the above stamped date. Please review this report carefully.

You may file a written objection to this Master's Report within **10 days** of the stamped date if you disagree or find errors with the Master's findings of fact, conclusion of law, or recommendations. Rule 23, W.R.Adj.R. If the Master's Report was mailed to you, the Montana Rules of Civil Procedure allow an additional 3 days be added to the 10-day objection period. Rule 6(d), M.R.Civ.P. If you file an objection, you must serve a copy of the objection to all parties on the service list found at the end of the Master's Report. The original objection and a certificate of mailing to all parties on the service list must be filed with the Water Court.

If you do not file a timely objection, the Water Court will conclude that you agree with the content of this Master's Report.

MASTER'S REPORT

Water Right Claim 39F 175930-00 appeared in the Preliminary Decree for the Little Missouri River, above Roundup (Basin 39F). The claim received an issue remark. Issue remarks result from Department of Natural Resources and Conservation ("DNRC") claims examination or by Water Court order. Claims examination confirms the historical use of water right claims and identifies issues with claims. If claims examination cannot

confirm some aspect of a claim, an issue remark is added to the claim. The claim did not receive any objections or notices of intent to appear.

The Court consolidated this claim into Water Court Case 39F-0130-R-2021 on September 3, 2021. The Court requested through the consolidation order that Claimants file information resolving the issue remark.

Claimants did not file anything by the filing deadline.

FINDINGS OF FACT

1. Claim 39F 175930-00 appeared with three issue remarks. Two issue remarks provide notice that the DNRC modified certain elements during Decree preparation work. Those remarks indicate they may be removed absent objections. The remaining issue remark states that the point of diversion may be incorrect. The DNRC proposes changing the point of diversion to N2NESE of Section 29, T7S, R62E.

2. The Court requested information regarding the location of the claimed reservoir. Claimants did not file any responsive information.

3. The reservoir record is currently described as N2NESE of Section 29, T7S, R62E.

4. The proposed legal land description appears to match a map included with the original statement of claim filing.

5. The point of diversion and place of use should both be changed to N2NESE of Section 29, T7S, R62E.

6. The issue remark should be removed from the above-captioned claim.

APPLICABLE LAW

1. A properly filed statement of claim is prima facie proof of its content. Section 85-2-227, MCA. The prima facie status of a claim may be overcome by a preponderance of the evidence. Section 85-2-227, MCA; Rule 19, W.R.Adj.R. A preponderance of the evidence is evidence that shows a fact is “more probable than not.” *Hohenlohe v. State*, 2010 MT 203, ¶ 33, 357 Mont. 438, 240 P.3d 628.

2. The Water Court must weigh an issue remark, and the information resulting in that issue remark, against the claimed water right. Section 85-2-247(2), MCA.

3. The Water Court must resolve all issue remarks not resolved through the objection process. Section 85-2-248, MCA. The Court must review information in the claim file or obtained by the Court to determine if there is a sufficient basis to resolve the remarks. 85-2-248(3), MCA.

CONCLUSIONS OF LAW

1. The changes described in the Findings of Fact may be made because the evidence in the record overcomes the prima facie status of the claim by a preponderance of the evidence.

2. The evidence in the record provides the Court with a sufficient basis to resolve and remove each issue remark from the above-captioned claim.

RECOMMENDATIONS

Based upon the above Findings of Fact and Conclusions of Law, this Master recommends that the Court make the changes specified in the Findings of Fact to correct the Preliminary Decree for this Basin. A Post-decree Abstract of Water Right Claim is served with this Report to confirm the recommended changes have been made in the state's centralized record system.
