MASTER'S REPORT

All water right claims that appeared in the Preliminary Decree for Sun River (Basin 41K) were subject to "issue remarks" resulting from pre-decree examination by the DNRC, objections, and counterobjections. The above-captioned claim received an issue remark during the DNRC's review of the claims.

The claim was consolidated into Case 41K-0705-R-2024 and an Order Setting Filing Deadline was issued by the Water Court requesting any additional information necessary to resolve the issue remark.

FINDINGS OF FACT

1. Claim 41K 56578-00 received the following substantive issue remark:

AN AMENDMENT WAS SUBMITTED ON 08/12/2020 REQUESTING TO AMEND THE FLOW RATE. THE AMENDMENT WAS NOT PROCESSED. THE AMENDMENT WILL BE REVIEWED AFTER THE ISSUANCE OF THE PRELIMINARY DECREE.

2. On September 3, 2024, Claimant United States Department of Agriculture, Forest Service (“Forest Service”) filed a *Response* which reiterated that the previously filed amendment resolved the issue remark and brought the claim into historical conformity. The *Response* states that correction to the flow rate is necessary to correct a decimal error in the original filing. The *Response* included attachments of the amendment requesting the following modifications to the claim:

- 8. Flow Rate Claimed: 5.0 cubic feet per second
 gallons per minute
 miner's inches
 - 9. Volume Claimed: _____ acre-feet per year
 - 10. Period(s) of Use: _____
(Month/Day TO Month/Day)
 - 11. Priority Date: (date of first use) _____
(Month/Day/Year)
 - 12. Type of Historical Right: Decreed Right
 Filed Appropriation Right
 Use Right
- Please attach proof of priority date or type of right.
- 13. Reasons for Amendment: To correct the flow rate of the above listed water rights.

 - 14. Comments: A decimal error was made in the flow rate when these rights were originally filed.

PRINCIPLES OF LAW

1. A properly filed Statement of Claim for an existing water right is prima facie proof of its content. Section 85-2-227, MCA; Rule 10, W.R.Adj.R.

2. Prima facie proof may be contradicted and overcome by a preponderance of the evidence. Rule 19, W.R.Adj.R.

3. A preponderance of the evidence is evidence that shows a fact is “more probable than not.” *Hohenlohe v. State*, 2010 MT 203, ¶ 33, 357 Mont. 438, 240 P.3d 628.

4. Section 85-2-248(2), MCA, requires that the Water Court resolve all issue remarks that are not resolved through the objection process. *See also* Rule 7, W.R.Adj.R.

CONCLUSIONS OF LAW

1. The proposed modification contained in the Forest Service’s *Response* and previously filed *Motion to Amend* resolve the issue remark appearing on the claim. Based on the information contained in the Forest Service’s first *Response*, along with the information contained in the attached *Motion to Amend*, the flow rate for claim 41K 56578-00 should be modified as described in Finding of Fact No. 2. The modification resolves the issue remark, and the issue remark should be removed from the claim.

2. The requested amendment and modification do not have the reasonable potential to adversely affect other water rights as they are corrections to the abstract which do not make any change to the actual historical use of the claimed right on the ground. Notice by publication of this amendment is not required.

RECOMMENDATIONS

Based on the foregoing Findings of Fact and Conclusions of Law, this Master recommends that the Court adopt the changes as outlined above.

A post decree abstract of the water right claim reflecting the recommended changes is attached to this Report.
