CONSOLIDATED ORDER APPROVING STIPULATION AND CLOSING CASES

The United States of America (USDA Forest Service and USDOJ Bureau of Land Management) (“United States”) and Edward K. McCauley, McCauley Family Ranches LLP, and McCauley Family Ranch LLC (collectively, “McCauley”) seek approval of “Stipulation to Resolve Objections” (“Stipulation”). The Stipulation contains terms and conditions to resolve objections the United States and McCauley filed on certain of each other’s water rights in Basin 41E, the Boulder River Basin.

BACKGROUND

The Boulder River is a tributary of the Jefferson River in Jefferson County. Portions of the Boulder River and its tributaries flow through the Beaverhead-Deer Lodge National Forest. The areas of the National Forest relevant to the water right claims in this case were reserved by the United States for forest purposes on April 12, 1906. Certain areas of the National Forest are designated as grazing allotments. Grazing allotments pertinent to these cases include the present-day Boulder, Galena, Little Boulder, Nez Perce, Sullivan Gulch, Sunrise, and Hadley Park allotments. Maps depicting the allotments are attached as exhibits to the Stipulation.

The United States filed claims for stock water rights on various sources within all these various allotments other than Hadley Park. The United States claimed a priority date of April 12, 1906. McCauley also filed claims for stock water use on the sources

within the present-day Galena and Sullivan Gulch allotments, as well as the Hadley Park allotment. McCauley claimed a priority date of May 1, 1905 for their claims.

The Water Court issued the Preliminary Decree for Basin 41E on October 19, 2022. The Preliminary Decree contains abstracts describing water rights with the elements claimed by both the United States and McCauley. Following issuance of the decree, the United States filed objections to McCauley's claims and McCauley filed objections to the United States' claims. The Court consolidated the objections into the three cases that are now the subject of this consolidated order. Case 41E-0155-R-2024 includes claims owned by McCauley that received objections from the United States. Case 41E-301-R-2024 includes claims owned by the United States that received objections from McCauley. Case 41E-0154-R-2024 includes one additional claim owned by the United States that McCauley objected to.

In addition to the objections, several of the claims contain notice-only issue remarks. The remarks did not generate any objections other than those filed by the United States and McCauley. Likewise, no other third parties filed notices of intent to appear.

DISCUSSION

A. Stipulation Terms.

1. Case 41E-0155-R-2024 (McCauley claims).

The Preliminary Decree abstracts for these claims have various dates for the period of diversion and period of use. The Stipulation requests that the periods of diversion and use be standardized to June 1 to October 31 for each of these claims. The Stipulation supports these modifications by documenting that grazing allotment rotation schedules established by the relevant permits historically allowed access to the water sources as early as June 1 and as late as October 31. The Stipulation also proposes modifications to the priority dates for the McCauley claims on all claims other than those on the Hadley Park allotment. The Stipulation proposes to modify these priority dates to April 12, 1906, which is more junior than what was decreed.

2. Case 41E-0154-R-2024 (United States claim 41E 54808-00).

Claim 41E 54808-00 describes a use right to use water from McCarty Creek for stock water use within the West Elkhorn allotment. The Preliminary Decree abstract does not quantify a numerical flow rate, but instead uses the standard narrative description of the minimum amount historically necessary to sustain direct from source stock water use.

McCauley objected to this claim in part because McCarty Creek is a decreed stream, meaning a district court issued a decree covering some of the water rights on the stream. Although the objection does not cite the decree, the objection appears to relate to a district court decree in the case *John J. Holt and J.R. Holt v. John Gleason*, Case No. 738 (Mont. First Jud. Dist., Jefferson County, Oct. 1, 1887).¹ The United States evidently was not a party to this case. However, because of the numeric flow rate quantification of other water rights on McCarty Creek, the Stipulation proposes a numeric flow rate of 5 gallons per minute (“gpm”) as a reasonably accurate estimate for historical use by 395 cow/calf pairs.

3. Case 41E-301-R-2024 (remaining United States’ claims)

a. Bison Creek Claims (41E 54714-00 and 41E 54717-00).

The Stipulation requests several modifications to the United States’ claims. First, the United States claims two water right claims on Bison Creek (claims 41E 54714-00 and 41E 54717-00). Bison Creek flows through several grazing allotments. Claim 41E 54714-00 generally corresponds to the southern (downstream) reach of the creek located within the present-day Sunrise allotment. Claim 41E 54717-00 generally corresponds to the northern (upstream) reach of the creek on the present-day Boulder and Sullivan Gulch allotments. As described on the Preliminary Decree, the point of diversion and place of use (“POD/POU”) for claim 41E 54717-00 includes SESWSW Section 3, W2 Section 10, and W2W2NW Section 15 of Township 5 North, Range 6 West. The POD/POU description does not describe the full upstream reach of Bison Creek to which stock have access, which includes National Forest land in W2W2 Section 3, Township 5 North, Range 6 West, as well as S2 Section 22 and NENW Section 27, Township 6 North,

¹ A copy of the *Holt v. Gleason* decree is contained in the claim file for McCauley’s claim 41E 8372-00, which the Water Court addressed in case 41E-0259-R-2024.

Range 6 West. In addition, the POD/POU in Section 15, Township 5 North, Range 6 West, is on the Nez Perce and Sunrise allotments and is more logically included in claim 41E 54714-00.

To clarify these discrepancies, the Stipulation proposes that claim 41E 54714-00 is for use presently occurring within the Nez Perce and Sunrise allotments. The Stipulation proposes that the POD/POU for claim 41E 54714-00 be modified as follows:

<u>ID</u>	<u>Qtr Sec</u>	<u>Sec</u>	<u>Twp</u>	<u>Rge</u>	<u>County</u>
1		21	5N	6W	JEFFERSON
2	W2W2NW	22	5N	6W	JEFFERSON
3	W2SWSW <u>W2W2</u>	15	5N	6W	JEFFERSON
4	SWNWSW	15	5N	6W	JEFFERSON

The Stipulation also provides that claim 41E 54717-00 is appurtenant to the Sullivan Gulch and Boulder allotments. The Stipulation proposes that the POD/POU for claim 41E 54717-00 be modified as follows:

<u>ID</u>	<u>Qtr Sec</u>	<u>Sec</u>	<u>Twp</u>	<u>Rge</u>	<u>County</u>
1	W2W2NW	15	5N	6W	JEFFERSON
2 <u>1</u>	W2	10	5N	6W	JEFFERSON
3 <u>2</u>	W2SWSW <u>W2W2SE</u>	3	5N	6W	JEFFERSON
<u>3</u>	<u>S2</u>	<u>22</u>	<u>6N</u>	<u>6W</u>	<u>JEFFERSON</u>
<u>4</u>	<u>NENW</u>	<u>27</u>	<u>6N</u>	<u>6W</u>	<u>JEFFERSON</u>

The period of diversion and period of use for claim 41E 54717-00 should be amended to JUNE 1 TO OCTOBER 31.

b. Little Boulder River, North Fork Claims (41E 54725-00 and 41E 54726-00).

Claims 41E 54725-00 and 41E 54726-00 describe rights to instream water use from the North Fork of the Little Boulder River for direct from source stock water use. The POD/POUs for 41E 54725-00 included on the Preliminary Decree abstracts are on the present-day Galena allotment but include a small portion of the reach on the present-day Little Boulder allotment in S2SE Section 2, Township 5 North, Range 5 West. The

POD/POUs shown on the Preliminary Decree for claim 41E 54726-00 are located on the present-day Little Boulder allotment. Prior to 1976, the Little Boulder allotment and Galena allotment were a single allotment.

The Stipulation reflects the parties' private agreement that 482 cow/calf pair was the historical maximum number of animal units permitted on the combined Little Boulder and Galena allotments. The Stipulation also requests that claim 41E 54725-00 be split by generating an implied claim to represent the stock water use that historically occurred on what is now the Little Boulder allotment, separate from the stock water use that historically occurred on what is now the Galena allotment. The Stipulation proposes the following split:

The POD/POU for claim 41E 54725-00 should be modified as follows:

<u>ID</u>	<u>Qtr Sec</u>	<u>Sec</u>	<u>Twp</u>	<u>Rge</u>	<u>County</u>
1	NESWSE	3	5N	5W	JEFFERSON
2	SESE	3	5N	5W	JEFFERSON
3	<u>S2SW</u> S2S2	2	5N	5W	JEFFERSON

The elements of the split claim created from 41E 54725-00 – which is assigned the claim no. 41E 30171521 are the same as claim 41E 54725-00, except the POD/POU should have the following legal description and remark:

<u>ID</u>	<u>Qtr Sec</u>	<u>Sec</u>	<u>Twp</u>	<u>Rge</u>	<u>County</u>
1	S2SE	2	5N	5W	JEFFERSON

The Stipulation also proposes the following remark:

THE POINT OF DIVERSION AND PLACE OF USE ARE LIMITED TO
FEDERAL LAND.

The proposed remark is acceptable, but will be modified slightly to place it on the abstract for both the point of diversion and the place of use elements.

c. Hadley Park Allotment claims (41E 54753-00, 41E 54755-00, 41E 54750-00, 41E 54757-00, 41E 54756-00, and 41E 54758-00).

The United States' claims for stock water on the Hadley Park allotment—41E 54753-00, 41E 54755-00, 41E 54750-00, 41E 54757-00, 41E 54756-00, and 41E 54758-

00 (“U.S. Hadley Park Claims”)—appeared on the Preliminary Decree but did not receive objections and are not consolidated into any pending case. No modifications are proposed or are necessary to the elements of these claims. However, the Stipulation proposes that the following remark be included to acknowledge the senior McCauley claims:

THE UNITED STATES RECOGNIZES WATER RIGHT CLAIM NO.
[*McCauley claim number on same source*] WHICH COVERS THE SAME
SOURCE ASSOCIATED WITH THIS CLAIM BUT WITH A SENIOR
PRIORITY DATE.

These claims are not part of the case, but the remark is acceptable. In order to add the remark, the Court calls the claims in on motion and adds them to the caption, and includes revised abstracts that include the remark, along with a reference to this case number.

d. Provisions related to change application 41E 30148132.

The Stipulation recites facts concerning a pending application to change claim 41E 54725-00, including a petition for judicial review currently pending in case no. MAPA-0001-WC-2023. The Stipulation contains a provision outlining steps the parties will take related to this application and the pending petition for judicial review if the Court authorizes the generation of an implied claim from claim 41E 54725-00, which the Court does as provided in this Order.

B. Standard for Approval.

Settlement stipulations are contracts setting the terms that parties agree to resolve objections. A settlement stipulation may include a claimant’s legally binding commitment to modify claims to resolve objections and issue remarks, and an objector’s agreement to withdraw objections conditioned upon the Court’s acceptance of the claim modifications. In determining whether to accept claim modifications proposed in the stipulation, the Court applies Rule 17, W.R.Adj.R. Under Rule 17(a), settlement stipulations are subject to Water Court review and approval when they resolve issues within the Court’s jurisdiction. *See also*, § 85-2-233(5)(b), MCA. The Court may rely on the terms of a stipulation as long as they are “not contrary to law, court rule, or public

policy.” *In re Marriage of Hill*, 265 Mont. 52, 58, 874 P.2d 705 (1994). When a stipulation proposes modifications to water right claim elements, the Court still must evaluate each proposed modification to ensure the modification is supported by the evidence and is consistent with what the Court may adjudicate and its obligation to resolve issue remarks. *In re Argabright*, Case 41I-265, 2014 Mont. Water LEXIS 9, (December 12, 2014) (affirming rejection of stipulation); *In re Dana Ranch Co.*, Case 41J-265, 2017 Mont. Water LEXIS 13 (rejecting stipulation); Section 85-2-248(3), MCA. The evidentiary standard is relaxed as to terms when a settlement stipulation proposes to reduce an element of a water right claim. Rule 17(c), W.R.Adj.R.

C. Application of Standard and Conclusions.

The Stipulation meets the applicable standards. Each of the modifications to the claims are supported by stipulated facts. The priority date modifications to the McCauley claims are reductions in a claim element by making priority dates more junior. As such, they qualify for the reduced evidentiary standard in Rule 17(c), W.R.Adj.R. Additionally, information remarks reflecting the private agreements between the parties are commonly authorized by the Court where, as here, there is nothing in the Stipulation that improperly modifies any elements of a claim.

The request for an implied claim from claim 41E 54725-00 really is a request for a split claim. Because the elements of the claims as split to not exceed the parent claim prior to the split, the split is authorized. Rule 26, W.R.Adj.R. Even if it was an implied claim as the Stipulation requests, it meets the standard for generation of an implied claim because it (1) is created from the existing elements of the claim; (2) is supported by historical evidence of the current claim, especially with the objections resolved; and (3) does not contain any indication of increasing the burden on the source. *In re Lee E. Foss*, Case 76HF-580, 2013 Mont. Water LEXIS 17, *32 (Order Amending and Partially Adopting Master's Report as Amended); *Hoon v. Murphy*, 2020 MT 50, ¶ 54, 399 Mont. 110, 460 P.3d 849 (upholding implied claim based on “substantial credible evidence” of historical use).

In the course of modifying the abstracts, the Court noted several clerical errors. First, the abstract for claim 41E 30145429 states that the source name is SPRING, ROSIE MURPHY MURPHY SPRING. The copy of the USGS topographic map attached to the claim examination worksheets confirm it should be corrected to SPRING, ROSIE MURPHY SPRING.

Next, an error also exists on claim 41E 30145453. The Preliminary Decree states that the source is ALSO KNOWN AS BUTTERMILK JUM GULCH. The statement of claim and examination worksheets confirm it should be corrected to ALSO KNOWN AS BUTTERMILK JIM GULCH.

ORDER

Therefore, it is ORDERED:

1. The Stipulation is APPROVED.
2. The claims are modified as provided in this Order, and claim 41E 30171521 is authorized and created from claim 41E 54725-00.
3. Claims 41E 54750-00, 41E 54753-00, 41E 54755-00, 54756-00, 41E 54757-00, and 41E 54758-00 are called in on motion for the limited purpose of adding the information remarks specified in the Stipulation.
4. All issue remarks are resolved and all objections are DISMISSED.

Post-decree abstracts of the claims are included with this Order to confirm the modifications to the claims have been made in the State's centralized water rights record system.

ELECTRONICALLY SIGNED AND DATED BELOW.

POST DECREE

ABSTRACT OF WATER RIGHT CLAIM

BOULDER RIVER, TRIBUTARY TO JEFFERSON RIVER

BASIN 41E

Water Right Number:41E 54628-00 STATEMENT OF CLAIM

Version:3 -- POST DECREE

Status:ACTIVE

Owners:USA (DEPT OF AGRICULTURE FOREST SERVICE)
WATER RIGHTS PROGRAM MANAGER, NORTHERN REGION
26 FORT MISSOULA RD
MISSOULA, MT 59804-7203

Priority Date:APRIL 12, 1906

Type of Historical Right:USE

Purpose (Use):STOCK

Flow Rate:A SPECIFIC FLOW RATE HAS NOT BEEN DECREED BECAUSE THIS USE CONSISTS OF STOCK DRINKING DIRECTLY FROM THE SOURCE, OR FROM A DITCH SYSTEM. THE FLOW RATE IS LIMITED TO THE MINIMUM AMOUNT HISTORICALLY NECESSARY TO SUSTAIN THIS PURPOSE.

*Volume:THIS RIGHT INCLUDES THE AMOUNT OF WATER CONSUMPTIVELY USED FOR STOCK WATERING PURPOSES AT THE RATE OF 30 GALLONS PER DAY PER ANIMAL UNIT. ANIMAL UNITS SHALL BE BASED ON REASONABLE CARRYING CAPACITY AND HISTORICAL USE OF THE AREA SERVICED BY THIS WATER SOURCE.

Source Name:SPRING, UNNAMED TRIBUTARY OF KLEINSMITH GULCH

Source Type:GROUNDWATER

ALSO KNOWN AS SUNNYSIDE SPRING
