### **ORDER ON MOTION TO CORRECT**

The United States of America, on behalf of the Department of Interior, Bureau of Reclamation (“Reclamation”) filed a Motion to Correct asking the Court to modify the decreed period of diversion for three water right claims associated with the Willow Creek Reservoir in the Sun River Basin (Basin 41K). For the reasons stated in this Order, the Court grants the motion.

### **BACKGROUND**

Willow Creek Reservoir is an onstream reservoir that impounds water on Willow Creek. Willow Creek is a tributary of the Sun River that flows generally easterly from its headwaters in the Rocky Mountain Front area, which is northwest of Augusta in Lewis and Clark County. Reclamation uses the reservoir as part of the Sun River Project which is part of an interrelated storage and delivery system that supplies water to the Greenfields Irrigation District (“GID”) and the Fort Shaw Irrigation District (“FSID”).

Reclamation holds three water right claims associated with the Willow Creek Reservoir. Claims 41K 40892-00 and 41K 40893-00 describe rights to divert and store water from Willow Creek in the reservoir for irrigation use. Claim 41K 40894-00 describes a water right to divert water from the Sun River and convey it to the reservoir via the Willow Creek Feeder Canal.

The Water Court issued a Temporary Preliminary Decree (“TPD”) for Basin 41K in 1985. The TPD included these three claims. The claims received objections and also were called in on motion by the Water Court. They were consolidated into cases and were part of lengthy proceedings that involved a number of Sun River Project water right claims and the two districts. Ultimately the Water Court consolidated the cases involved in these proceedings into several “joint proceedings.” These three claims were included in the cases that were part of Joint Proceeding B.<sup>1</sup>

In 1985 when the Water Court issued the Basin 41K TPD, decree abstracts described a period of use for each claim, but did not describe a period of diversion. The TPD described the period of use for the two Willow Creek claims (41K 40892-00 and 41K 40893-00) as January 1 to December 31, and the period of use for the Sun River claim (41K 40894-00) as March 1 to December 31.

In 2008 while the 41K joint proceedings still were underway, the Water Court issued a statewide Order on Period of Diversion, as later twice amended. (SWO-0001-WC-2008<sup>2</sup>). The statewide period of diversion orders asked the Department of Natural Resources and Conservation (“DNRC”) to examine and include periods of diversion for all claims. The orders set procedures for doing so that varied to some degree based on the decree status of the claims. For basins like Basin 41K that the Court decreed prior to

---

<sup>1</sup> Joint Proceedings “B” involved three previously consolidated cases. Claim 41K 40893-00 was part of Case 41K-82. Claims 41K 40892-00 and 41K 40894-00 were part of Case 41K-83.

<sup>2</sup> This case number refers to the case in the Water Court’s Full Court Enterprise case management system that contains the docket for these orders.

October 2008, the orders instructed DNRC to print period of diversion dates on the abstracts, together with a P161 information remark.<sup>3</sup>

In 2013, Reclamation and the irrigation districts entered into a Stipulation under which Reclamation agreed to a number of modifications to the claims involved in the joint proceedings, including claims 41K 40892-00, 41K 40893-00, and 41K 40894-00. The Water Court approved the Stipulation in a Master's Report filed on March 26, 2015, as amended on March 18, 2016 and adopted by the Court on April 12, 2016.

The Master's Report adopted by the Court includes post-decree abstracts (abstract versions 2) for the three claims. The abstracts for all three claims identify periods of diversion that are the same as the periods of use stated in the TPD abstracts: January 1 to December 31 for claims 41K 40892-00 and 41K 40893-00, and March 1 to December 31 for claim 41K 40894-00. The modified abstracts approved in the 2016 order provide for periods of use of April 1 to October 31 for all three claims.

Basin 41K is one of several basins in Montana that require additional examination and a preliminary decree under the terms of the Water Court's December 14, 2012 Reexamination Order (SWO-0002-WC-2012, Doc. 1.00). The Reexamination Order called for the Department of Natural Resources and Conservation ("DNRC") to reexamine several specific elements of water right claims in these basins. One of the elements requiring reexamination was the period of use. Evidently based on this authority, DNRC reduced the period of diversion for the three claims to April 1 to October 31, which matches their periods of use.

The Water Court issued the Basin 41K Preliminary Decree on January 28, 2021, just five years after the Joint Proceeding B case was finalized. The Preliminary Decree included abstracts (version 3) for the three claims. Each decree abstract described the

<sup>3</sup> The P161 remark specified in the orders states: WHEN THIS CLAIM WAS ORIGINALLY DECREED, THE PERIOD OF DIVERSION WAS NOT INCLUDED AS AN ELEMENT OF THE CLAIM. IN 2008, THE PERIOD OF DIVERSION ELEMENT WAS ADDED TO ALL CLAIM ABSTRACTS. IT IS NOT CERTAIN IF THE PERIOD OF DIVERSION DATES ADDED TO THIS CLAIM ACCURATELY REFLECT THE HISTORICAL PERIOD OF DIVERSION. MORE INFORMATION IS REQUIRED.

periods of diversion and the periods of use as April 1 to October 31. Each abstract also included the following issue remark:<sup>4</sup>

THE CLAIMANT DID NOT IDENTIFY THE PERIOD OF DIVERSION FOR THIS RIGHT. A PERIOD OF DIVERSION HAS BEEN ADDED TO MATCH THE PERIOD OF USE. IF NO OBJECTIONS ARE RECEIVED TO THE PERIOD OF DIVERSION OR PERIOD OF USE, THOSE ELEMENTS WILL BE DECREED AS SHOWN ON THIS ABSTRACT AND THIS ISSUE REMARK WILL BE REMOVED FROM THIS CLAIM.

Issuance of the Preliminary Decree commenced an objection period that closed on July 27, 2021. No one filed objections to the three claims. After the counterobjection period closed, the Water Court provided an objection list that included the three claims based on the period of diversion issue remark. In response to the objection list, Broken O Land & Livestock LLC (“Broken O”) filed notices of intent to appear as to all three claims.

The Water Court consolidated the three claims into Case 41K-0564-R-2023. On July 21, 2023, the Court issued a Closing Order removing the issue remarks from the three claims based on the lack of any objections. The abstracts (version 4) attached to the Closing Order retain the April 1 to October 31 periods of use and periods of diversion as specified in the Preliminary Decree abstracts and removed the issue remarks. The Court mistakenly sent copies of the Closing Order and post-decree abstracts to the United States Bureau of Land Management, but did not send them to Reclamation.

Reclamation filed its Motion to Correct on March 19, 2025. The motion asks the Court to restore the periods of diversion that the Court confirmed in 2016 when it approved the Stipulation. The motion is supported by a Declaration of Kraig Van Voast (the “Van Voast Declaration”), which incorporates some of the background material. The

<sup>4</sup> Claim 41K 40893-00 also included the following P370 issue remark:

THE CLAIMANT DID NOT IDENTIFY THE PERIOD OF DIVERSION FOR THIS RIGHT. A PERIOD OF DIVERSION HAS BEEN ADDED TO MATCH THE PERIOD OF USE. IF NO OBJECTIONS ARE RECEIVED TO THE PERIOD OF DIVERSION OR PERIOD OF USE, THOSE ELEMENTS WILL BE DECREED AS SHOWN ON THIS ABSTRACT AND THIS ISSUE REMARK WILL BE REMOVED FROM THIS CLAIM.

motion also includes various arguments about why the Court should modify these three claims.

## DISCUSSION

### **A. Legal Standards.**

Reclamation's motion asks the Court for relief from abstracts confirmed in the Closing Order by modifying the periods of use so they match what the Court previously approved when it accepted the Stipulation resolving Joint Proceedings B. Reclamation cites M.R.Civ.P. Rule 60(b)(1) as authority for its motion. This rule states:

On motion and just terms, the court may relieve a party or its legal representative from a final judgment, order, or proceeding for the following reasons: (1) mistake, inadvertence, surprise, or excusable neglect.

The Court considers four factors to determine whether to grant relief based on this rule: (1) whether the moving party proceeded with diligence; (2) whether the moving party's neglect was excusable; (3) whether the ruling, if permitted to stand, will affect the party injuriously, and (4) whether the party has a meritorious defense. *In re Bos*, Case 41H-0487-R-2022, 2023 Mont. Water LEXIS 29, 2023 WL 1069725. The Court draws these factors from the general test used to set aside default judgments. For purposes of this motion, the Court modifies the sequence of these factors to address the meritorious defense and injury factors at the outset because they frame the rest of the analysis.

### **B. Application.**

#### *1. Meritorious Defense.*

Reclamation has a meritorious defense. Reclamation asks for nothing more than for the Court to restore what the Court already approved in the Joint Proceedings. To that end, although Reclamation's motion does not cite the Water Court's Reexamination Order, the terms of the Reexamination Order provide additional support to grant the motion. The Reexamination Order states:

Any element of a claim that has been litigated by the Water Court shall not be subject to standardization or further DNRC review. To identify whether an element has been subject to litigation, the objection list issued for the previous decree should be reviewed. An element of a claim that appeared

on the objection list should not be subject to modification based on implementation of the DNRC proposal. *Additionally, an element that was modified as a result of Water Court proceedings and marked by an asterisk should not be subject to modification based on implementation of the DNRC proposal.*

Reexamination Order, at 4 (emphasis added).

The Preliminary Decree abstracts meet the standard in the Reexamination Order for when the claims should not have been modified. The Water Court had already modified the period of diversion element in the Joint Proceedings by adding it as an element after issuance of the TPD and then approving it as litigated and resolved the 2016 order adopting the Stipulation. The period of diversion element also is marked with an asterisk on the Preliminary Decree abstracts, as required by the Reexamination Order. Had the Reexamination Order been followed in the Basin 41K Preliminary Decree, the period of diversion element would not have been modified in a manner contrary to what already had been litigated and resolved.<sup>5</sup>

## 2. *Injury.*

The Willow Creek Reservoir operates like many reservoirs in Montana. The reservoir fills by capturing water from melting snowpack. This generally occurs before water is needed for irrigation. As runoff diminishes, releases of stored water supplements natural flows allowing the irrigation to extend later into the year. This storage regime is common in Montana and justifies periods of diversion that begin earlier in the year than commencement of the period of use. The divergence between the periods of diversion and the periods of use were reflected in the abstracts approved by the Court following the Joint Proceedings.

Reclamation's motion explains the potential injury that will occur if the motion is not granted. Reclamation delivers stored water from Willow Creek Reservoir to multiple

---

<sup>5</sup> This is not the first time this problem has occurred. In another case involving the Sun River Project, the Court modified In re United States Bureau of Reclamation, Case 41K-0073-R-2023, 2024 Mont. Water LEXIS 193; (restoring elements of claims modified from what previously was approved in a Basin 41K stipulation).

downstream water users as part of the Sun River Project. Not restoring the period of diversion will curtail Reclamation's ability to store water earlier in the year. As Reclamation explains, runoff sometimes occurs early in the season when episodic warm chinook winds along the Rocky Mountain Front cause snowmelt to occur even during months typically viewed as mid-winter. If the claims are not corrected to what the Water Court previously ruled, the more constrained period will preclude Reclamation from storing water during runoff periods early in the year even though these early season months are outside the normal irrigation season. This in turn may reduce the amount of water that is available later in the year to supplement natural flows.

In evaluating the injury aspect of the test, the Court also notes the lack of injury to third parties. Multiple parties participated in the Joint Proceedings and had the opportunity to object to the periods specified in the Stipulation. One of these parties (Broken O) filed a notice of intent to appear after the Preliminary Decree, but did not file any response to Reclamation's motion.<sup>6</sup> The Court presumes no injury to any third party, especially since Reclamation does not request any modification to any element other than correcting the period of diversion.

### 3. *Diligence.*

The Rules of Civil Procedure require that a Rule 60(b)(1) motion be filed "within a reasonable time – and for reasons (1), (2), and (3) no more than a year after the entry of the judgment or order or the date of the proceeding." Rule 60(c)(1), M.R.Civ.P. Notwithstanding this deadline, the Water Court has leniency with Rule 60(c)(1) because the Court's orders are interlocutory prior to issuance of a final decree. *In re McCarty*, Case 41Q-0040-P-2024, 2024 Mont. Water LEXIS 383, 2024 WL 3071180. However, leniency does not extend to allowing an unreasonable amount of time to file a motion. Instead "reasonable time" requires a factual inquiry which may vary in light of the facts

---

<sup>6</sup> Although not necessarily required to do so, Reclamation provided a courtesy copy of the motion to counsel for GID and FSID and neither responded with any objection to the motion. The Court assumes this to mean the districts agree the motion aligns with their views of the Stipulation.

and circumstances of a particular case. *In re Downs*, Case 43P-0164-P-2019, 2021 Mont. Water LEXIS 1075, 2021 WL 5410127.

Reclamation filed its motion more than three years after the Basin 41K objection period closed and a little more than eighteen months after the Closing Order. As Reclamation notes, the objection period occurred during and shortly after the administrative chaos related to COVID-19 and its aftermath. Moreover, there is no question that the Water Court mistakenly sent the Closing Order to the wrong federal bureau and did not include legal counsel from the Joint Proceedings on the service list. Once Reclamation discovered the issue, the Van Voast Declaration indicates the agency worked through a detailed analysis before filing this motion. In light of these facts and the context of the claims in this case, the Court has no basis to question Reclamation's diligence.

4. *Excusable neglect.*

Reclamation's motion acknowledges it neglected to file an objection after the Court issued the Basin 41K Preliminary Decree which contained abstracts of the three claims with modified periods of use. Under the facts of this case, whether Reclamation's neglect is excusable has two components. The first involves the legal question of whether the lack of a timely-filed objection bars the Court from considering the motion.

The Water Use Act requires objections to be filed within 180 days of issuance of a preliminary decree unless the Court extends the deadline, which it did not do in Basin 41K. Section 85-2-233(2), MCA. The Court carefully scrutinizes any motion filed after the objection deadline to determine whether it is really just a late objection disguised as a motion. *In re Brewer Ranch LLC*, Case 41I-2003-R-2023, 2023, Mont. Water LEXIS 393, 2023 WL 3551089. However, in certain limited, fact-specific circumstances, the Court will allow a motion to modify a claim even after the objection period closes. *See e.g., In re LR Huckaba Ranch Inc.*, Case 41E-6003-A-2024, 2024 Mont. Water LEXIS 422, 2024 WL 3462314 (authorizing motion to amend after objection deadline). Based on this authority, the 180-day objection deadline is not an absolute bar to the relief Reclamation seeks.

The second component to excusable neglect involves a factual inquiry into the reasons for the neglect. To evaluate the validity of the reasons, the Court looks to whether the neglected action was caused by something other than “mere carelessness or ignorance of the law on the part of the litigant or his attorney.” *In re Downs*, citing *Frye v. Roseburg Forest Prods. Co.*, 2020 MT 10, ¶ 12, 398 Mont. 347, 456 P.3d 573.

Under this standard, Reclamation’s motion shows excusable neglect. As already noted, Reclamation’s failure to object to the Preliminary Decree abstracts is viewed in light of unusual pandemic-related circumstances during the time of the objection period. This alone is not a viable excuse. However, it became more reasonable when coupled with the Preliminary Decree proceedings occurring so shortly after Reclamation completed a case that took years to resolve. The Water Court unfortunately exacerbated the problem by not sending the Closing Order to the correct federal bureau. Under these facts, Reclamation cannot be said to ignore the objection deadline due to carelessness or ignorance of the law.

Based on these facts, Reclamation’s motion shows good cause to modify the claims as it requests and the motion should be granted.

## **ORDER**

Therefore, it is ORDERED that Reclamation’s Motion to Correct is GRANTED. The period of use for claims 41K 40892-00 and 41K 40893-00 is modified to commence on January 1, and on March 1 for claim 41K 40894-00.

Post-decree abstracts of the claims are included with this Order to confirm the modifications to the claims have been made in the State’s centralized water rights record system.

ONLY 97,080.72 ACRES ARE IRRIGATED DURING ANY GIVEN IRRIGATION SEASON  
WITHIN THE APPROXIMATE 156,198.30 ACRES DESCRIBED UNDER THIS RIGHT.

**Remarks:**

THE WATER RIGHTS FOLLOWING THIS STATEMENT ARE SUPPLEMENTAL WHICH MEANS THE RIGHTS HAVE OVERLAPPING PLACES OF USE. THE RIGHTS CAN BE COMBINED TO IRRIGATE ONLY OVERLAPPING PARCELS. EACH RIGHT IS LIMITED TO THE FLOW RATE AND PLACE OF USE OF THAT INDIVIDUAL RIGHT. THE SUM TOTAL VOLUME OF THESE WATER RIGHTS SHALL NOT EXCEED THE AMOUNT PUT TO HISTORICAL AND BENEFICIAL USE.
