Program Narrative:

- ★ Must identify the population to be served and who makes referrals to the program.
- ★ If this is a revised plan, please explain what is being revised: budget, program, or both (e.g., if budget, simply state, Plan was originally approved for \$10,000, reducing amount to \$5,000, resulting in an estimated cost calculation of \$50.00 per session/hour x 100 youth - \$5,000.00).

Many youth are unable to contribute towards their restitution obligation because they have no family support, are not old enough to get a job, or lack the necessary social skills to get and keep a job. This is a program offered to youth as an opportunity, by utilizing community service, to earn restitution money to repay their victims. Youth will be referred by probation officers and considered if they have no assets to pay the ordered restitution, are unemployable due to age or have been unable to find employment. The program is intended to target those youth having restitution obligations, and meeting the above criteria.

Restitution will be earned at the minimum wage rate. Every youth must be covered by worker's compensation. If the youth is working for a not for profit organization the youth will be covered by state workers comp. If the youth is working for a contractor, the contractor shall provide proof of workers comp coverage.

No This proposal is presumed to be a service not requiring further explanation (e.g., sex offender evaluation, psychological evaluation, drug and alcohol evaluation, etc.).

Risk Factors Present in Youth Being Served by Program:

- ★ A minimum of 3 risk factors must be identified for each youth being served

1. **Criminal History** 2. **Employment History** 3. **Family Issues**

Outcome Measures to be Used:

- Outcomes must specifically relate to what the program is trying to change
- Outcomes must have specific timeframes over which the change is to occur
- Outcomes must specifically link the participating youth to the program
- When measuring outcomes, a baseline must first be established
- A minimum of two outcome measures are required
