

Written:

William M. Reiter, MD, FACP has practiced Internal Medicine in Anaconda, Montana since 1998. He received his BA in 1976 from The Johns Hopkins University and his MD in 1980 from the Albany Medical College, Union University. He completed his Internal Medicine residency in 1983 at the University of Miami Affiliated Hospitals in Miami, Florida where he was subsequently a clinical instructor and eventually a clinical associate professor of medicine until 1992. He was elected a Fellow of the American College of Physicians in 1986. From 1984 until moving to Montana in 1998, Dr. Reiter also served as Chief Executive Officer and Director of Research for Center for Special Immunology.

For the past 5 years Dr. Reiter has been focusing his attention on the development of best practices for medication-assisted treatment (MAT) of substance use disorders, including extensive use of telemedicine services and the development of “virtual integrated networks” to expand access to care.

Verbal:

Dr. Reiter, a graduate of the Johns Hopkins University, has been a Board-Certified Internist practicing medicine in Florida since 1983 and a Fellow of the American College of Physicians since 1986. He has practiced Internal Medicine in Montana since 1998.

Most recently, he has been focusing his attention on the development of best practices for medication-assisted treatment of substance use disorders. This includes extensive use of telemedicine services and the development of “virtual integrated networks” to expand access to care.
