

MINUTES OF THE MEETING
JOINT SUBCOMMITTEE
ON EDUCATION APPROPRIATIONS
MONTANA STATE
HOUSE OF REPRESENTATIVES

January 30, 1985

Tape 33 Side A

The meeting of the Education Subcommittee was called to order by Chairman Gene Donaldson at 8:05 A.M. on Wednesday, January 30, 1985, in Room 104 of the State Capitol.

All members were present.

The purpose of the meeting was EXECUTIVE ACTION on the Budget of the Agricultural Experiment Station.

Bill Sykes (33:A:045) of the Legislative Fiscal Analyst's office gave a review of the Experiment Station's budget. He said he met with personnel from the agency and worked out details on issues in the budget. He said he made a mistake in the calculation of health benefits. LFA current level for personal services should be \$6,305,649 for each year. Mr. Sykes said that if the faculty and graduate research assistants are excluded from 4 percent vacancy savings, an additional \$141,022 would be added to each fiscal year, bringing the LFA personal services total to \$6,446,671 for each year.

At this point, Chairman Donaldson asked Mr. Sykes if the budgets of the Bureau of Mines and other agencies were handled in this same way as far as faculty vacancy savings are concerned. Mr. Sykes said the faculties of the other agencies which had appeared before the Subcommittee were excluded from vacancy savings.

Mr. Sykes said that in the personal services area the issue which still should be considered is the adding back of the dairy FTE at \$62,353 for each year. Also, the Subcommittee needs to consider the issue of higher salaries for part-time employees. He said that on the earmarked revenue, the Agricultural Experiment Station will not generate the amounts of revenue projected by the LFA. He said the projected amount should be \$520,000 for each fiscal year. The General Fund total would change as a result of adding in the changes made in the personal services area, and subtracting the lower amounts projected for earmarked revenue. The new General Fund totals are \$5,720,052 for FY 86 and \$5,681,650 for FY 87, Mr. Sykes said.

A general discussion and question and answer session followed between Mr. Sykes, Sib Clack, Office of the Budget and Program

Education Subcommittee
Minutes
January 30, 1985

Planning, Dr. Welsh, Director, Agricultural Experiment Station, Dr. Tietz, President, Montana State University, and members of the Subcommittee (33:A:145).

Regarding the equipment budget, Chairman Donaldson said that when large equipment items are requested, it becomes necessary to approach them on an item-by-item basis. He said the best possible advice available relative to equipment needs in a station comes from members of the advisory committees.

Mr. Sykes distributed a revised list of equipment from the Experiment Station (EXHIBIT 1). Mr. Sykes explained that Dr. Welsh re-sorted the list to show items that are to be replaced, requested new items and upgrades.

Discussion of the personal services area of the budget followed (33:A:308).

Representative Moore (33:A:384) moved adoption of LFA current level personal services at \$6,446,671 for each year. The motion passed unanimously.

A discussion of the dairy research project followed between the Subcommittee members, Dr. Welsh and Dr. Tietz (33:A:441).

Dr. Welsh explained that the dairy herd and its maintenance have been discontinued. However, the research project work in the area of animal nutrition still deals with questions that apply to the dairy industry. Therefore, even though the dairy itself is closed, the people will be reassigned to other segments of animal nutrition work.

Dr. Tietz explained that only those FTE dependent upon the income from the dairy have been eliminated; the positions that were funded by the state have been transferred over to the new nutrition program.

Senator Hammond asked what adjustments caused the discontinuance of the off-station plots. Dr. Welsh said the issue that resulted in the reduction of off-station testing is associated with the vacancy rate problem. Senator Hammond asked if, with the adjustment of the vacancy rate, off-station testing would resume. Dr. Welsh said if the personal services budget that was just approved holds, then the agency will be able to resume the off-station work. Senator Hammond said this is probably the most effective work being done in agriculture in northern and northeastern Montana.

Senator Haffey (33:A:561) made a motion that \$62,353 for dairy research be approved for each year, and that it be included in current level, and added to the \$6,446,671 for personal services. There was a roll call vote, and the motion passed 6 - 1 with Representative Peck dissenting.

Education Subcommittee
Minutes
January 30, 1985

Tape 33 Side B

A discussion of part-time employees' salaries followed. Jack Noble, Office of the Commissioner of Higher Education, said that when the operating budget instructions for the University System is released, in order to have the FTE compiled for part-time people in a uniform rate, a value is assigned. In 1984 the value for non-physical plant and part-time employees was arrived at by dividing the budget category by \$15,400. This is done for all institutions so that there is a uniform FTE calculation, Mr. Noble said.

Further discussion of the issue followed between Mr. Noble, Ms. Sutton, Fiscal Officer, Agricultural Experiment Station, and Mr. Sykes (33:B:090).

Chairman Donaldson suggested that the issue be passed over until the next day, pending clarification.

Senator Haffey (33:B:125) moved acceptance of the inflation figures for operating expenses in the amounts of \$44,950 for FY 86 and \$53,217 for FY 87. The motion passed unanimously.

Discussion followed between the Subcommittee members, Dr. Welsh, Dr. Tietz, Ms. Sutton and Mr. Sykes regarding supplies and materials expenses (33:B:220).

Representative Moore suggested that on this issue, the Experiment Station and LFA's office start at zero and clarify exactly what funding is needed, and that any decision be delayed until the next day. Chairman Donaldson concurred with the suggestion.

Representative Moore (33:B:368) moved adoption of LFA current level for equipment in the amounts of \$100,516 for FY 86 and \$107,110 for FY 87. The motion passed unanimously.

A discussion of equipment followed between Dr. Welsh, Larry Johnson, a member of the Advisory Council, and the Subcommittee members (33:B:400).

Tape 34 Side A

Senator Haffey asked Chairman Donaldson if he wanted to go through the revised equipment list item-by-item. Chairman Donaldson said he didn't think that was necessary and said that the Advisory Council had been very careful when putting the list together. Larry Johnson said the equipment list contains all top priority items, no "pork barrel."

Education Subcommittee
Minutes
January 30, 1985

Senator Haffey said that either the entire amount of equipment should be included in the modified column, or some part of the \$592,227 and \$519,372 should be identified as current level. Chairman Donaldson said the problem with driving off of current level is that if the base is in error, which could possibly be the case, then the problem gets worse as you go along.

Senator Haffey said a different definition of current level is: "necessary to serve the needs of the particular agency and to fulfill its defined goals." Representative Hand noted that his concern is that if the necessary equipment is not funded, but the people are there, they will have nothing to do.

Dr. Welsh said it is not correct to say that there has been no concern about capital equipment on the part of the Legislature. The problem has been, however, the level that has been made available relative to the level of need.

Representative Moore (34:A:250) moved adoption of the modified equipment request of the Agricultural Experiment Station in the amounts of \$592,227 for FY 86 and \$519,312 for FY 87.

There was discussion of the motion.

Representative Moore said that somewhere within the Experiment Station's budget, money would have to be found to pay for the equipment. Senator Haffey suggested that the motion be amended so that the amounts are subject to submission to the Subcommittee of numbers that reflect consistency within the last four years.

Senator Haffey suggested that the issue be reconsidered at the next meeting of the Subcommittee, and that part of the \$592,227 and \$519,312 be included in current level, and that the \$100,000 be increased accordingly, leaving the remainder as a modified. Representative Peck said that, on that basis, a list of equipment that would substantiate the base is necessary. Senator Hammond said that needs change, and such a list shouldn't be required.

Following further discussion of the equipment issue, Representative Moore withdrew the motion.

The meeting adjourned at 9:55 A.M.

Gene Donaldson, Chairman

[illegible]

Gene Donaldson

Chairman Gene Donaldson

Motion: Senator Haffey moved that \$62,353 for dairy research
be approved for the Agricultural Experiment Station for
each year, and that it be included in current level and
added to the \$6,446,671 for personal services.

EXPLANATION OF MAES EQUIPMENT LIST

The MAES equipment list is broken into two lists; one for 1986 and one for 1987 (Headings in green). Each list is subtotaled on Category Of Need (Headings and subtotals in pink). Within each Category Of Need is a subsubtotal on each type of equipment (Headings and subsubtotal in yellow).

There are five types of Categories Of Need (marked in pink):

1. NEW EQUIP. Items that were not on the inventory list before.
2. OBLIGATIONS. Items which have purchase costs obligated in previous years.
3. REPLACEMENTS. Items which are replacements for items on the inventory list.
4. SIDNEY/USDA Items which were jointly used at Eastern in Sidney with USDA and lost when USDA relocated.
5. UPGRADES Items which represent an upgrading of one piece of equipment or a replacement of equipment which had been borrowed.

Each of the above five Categories Of Need are broken down into subsubtotals (marked in yellow) such as Farm Machinery, Tractors, Laboratory & Scientific etc.

Below are described what type of data can be found in each of the columns:

1. Id. A unique code for each item.
2. Description. Describes the old or new item.
3. Hr/Miles. Lists the number of hours or miles on each item.
4. Cost. Gives the replacement cost of the item.
5. Justification-For-Item. Gives an explanation of the need.
6. Location. Gives the name of the department and its location.
