### MINUTES OF THE MEETING EDUCATION SUBCOMMITTEE 50TH LEGISLATURE

### January 12, 1987

OVERVIEW: (7-1-A-000) Dori Nielson from the Office of the Legislative Fiscal Analyst gave the committee an overview of the agencies and the issues to be considered by this committee this week.

<u>Vo-Ed Council</u>: The Vo-Ed Council is entirely federally funded. There are two FTE. The federal funding is independently assigned for the council under the Carl Perkins Act. A state vo-ed council is a requirement in order to receive vo-ed funds. Funding had been cut by Gramm-Rudman to \$112,113 but it was restored to its original \$116,350. Funding is presently at least \$120,000 for this next year. Since the director's position was vacant for seven months in fiscal 1986 both personal services and operating expenses were curtailed. Consequently, there will be considerable difference from the 1986 expenditures to the budget for 1988 and 1989.

The vo-tech centers are administered by Vo-Tech Centers: the Office of Public Instruction. OPI is designated as the sole state agency to receive vocational education funds. One individual is assigned by that agency to administer vo-ed programs. The five vo-tech centers have approximately 2,500 students with a director at each center. House Bill 39 is a result (049) of the joint subcommittee actions, and recommends transferring governance of the vo-tech centers to the Board of Regents. The bill designates that as of June 30, 1989, employees would become employees of the Board of Regents. A budgeting formula is used to arrive at a funding level for this agency. Current level uses a 95 percent funding level, which represents the present funding level for these agencies due to the actions of Special Session III.

The executive budget has been revised due to a need to recalculate portions of the formula. Norm Rostocki of the Office of Budget and Program Planning used somewhat different formula factors. The OBPP used increased tuition in the same as in current level. OPI has recommended the increases. Funding consists of tuition revenue, federal funds, coal tax interest, the one and one-half mill levy, and general fund as the final plugged-in amount.

When questioned about the tuition increase, Gene Christiaansen of the Office of Public Instruction, said that

Education Subcommittee January 12, 1987

a survey of the surrounding states shows Montana slightly lower than the surrounding states by about 4 percent.

A portion of the interest from the educational trust is assigned to the Vocational-Technical Centers and Adult Basic Education. The law does not divide the money but this committee establishes the division of the money.

The Carl Perkins Act defines the requirements for receiving federal vo-ed funding (147). Grants need to be written to revamp curriculum, to include new technologies, and to fulfill new requirements. Match money can come by choosing to drop or scale back ongoing programs and use the savings to begin a new program. Current level revenue sources for the 1989 biennium show federal funds representing from 10 to Discussion followed concerning 11 percent of the total. matching funds and the difficulties associated obtaining federal funds. Questions were raised concerning transferring matching funds into programs, applying federal funds to redesigned classes, and making changes to existing programs in order to use federal funds. The feeling was expressed that federal funds would not be replaced by general fund. The biggest issue in the vo-tech centers' budgets is the use of the federal funds.

The appropriated spending authority does not represent the final budget. The local voter levy provides 10 to 15 percent of the total budgets. The centers request additional spending authority for voted levy funds. This amount is not included in the formula or the revenue projections. Whatever the legislature authorizes can be expanded at each of the centers. This give flexibility for the centers to expend the money wherever they want.

An explanation of the budget formula (Exhibit 1) was distributed by Dori Nielson of the LFA. The calculation of program expenditures are done in four areas. They are instruction, support, plant operation and maintenance, and equipment. The first three include calculations for personal services and operating expenses. The equipment budget has both variable equipment and capital equipment. factors involved in the budgeting formula were discussed. Each factor that is accepted or changed will impact other areas. Enrollment estimates, inflation factors, compensation levels and staffing standards, and the funding level are the factors that will impact the budget in an interrelated fashion. It may be easier to make decisions on enrollment and the other factors and then after recalculation done by the LFA, come back and look at the budget amounts.

(7-1-A-377) The meeting of the Education Subcommittee was called to order by Chairman Nathe at 8:08 a.m. on Wednesday,

Education Subcommittee January 12, 1987

January 12, 1987 in Room 104 of the State Capitol following the overview.

ROLL CALL: All members were present. Also present were Dori Nielson of the Legislative Fiscal Analyst's office, Norm Rostocki of the Office of Budget and Program Planning and Deb Thompson, Secretary.

### STATE COUNCIL ON VOCATIONAL EDUCATION

OBPP: Since the directors position was open for seven months the base year expenditure level is not representative of council operations. The council is entirely federally funded with no general fund match. The allocation is based on federal legislation. The executive budget total is basically the same as the LFA budget with the exception of the executive allocation for vacancy savings. Since additional federal funds have recently become available, the OBPP has no objection to expansion of the council's budget.

<u>LFA</u>: Few difference exist between the executive and current <u>level</u>. A planned expansion of services to be accomplished has been mapped out by the director. There is very little difference in operating expenses. Approximately \$5,000 more per year is available now for the council than was available when the current level was prepared. A carryover of about \$60,000 from previous years provides additional funding possibilities.

### Agency: Vo-Ed Council

Bill Olfert, Executive Director of the Montana Council on Vocational Education, requested a \$120,000 budget, which is higher than recommended by either the LFA or OBPP (Exhibit 3).(515) He expressed the need for an increase in the operations amount, and indicated that the federal funds for the council had now been increased to \$120,000. He explained that the requested increase would allow the council to do more effective data collection to assist in key policy making.

Discussion followed. Senator Hammond inquired as to suggestions for ways the vo-tech centers could utilize federal funds. The vo-ed money must be matched dollar for dollar and used for new and innovative activities.

<u>Proponents:</u> Gene Christiaansen, Assistant Superintendent of Vocational Education services under the Office of Public Instruction, offered support for the Vo-Ed Council.

Opponents: There were no opponents.

It was noted in committee discussion that the Carl Perkins Act provides that the present funding level be maintained for a three year period.

### **VO-TECH CENTERS:**

The question was raised concerning the effect of HB39 transferring the vo-tech centers to the Board of Regents authority. Chairman Nathe briefly explained that the committee would proceed on the basis that the present status will continue. Necessary adjustments will be made if changes occur due to HB39.

OBPP: Norm Rostocki of the OBPP stated that the executive budget has been revised. The committee will need to address six issues: enrollment, funding, personal services compensation, operating expense rates, revenue sources and FTE. The most important factor will be enrollment. An estimate of the additional amount of millage required will be needed if HB39 does pass. Capital and variable equipment costs will also be factors that will impact the budgets.

<u>LFA</u>: Dori Nielson (B-183) referred to Exhibit 4. She explained that the enrollment figures will impact the budget in several areas. She also noted the differences between the executive and the current level budget, adding the difference in the equipment portion. The executive budget did not include capital equipment as that is decided per request. The LFA will provide an equipment list for the work session. It was noted that the 1985 Legislature chose to give a flat rate of \$31,350 to each center, so current level reflects that rate discounted to 95 percent.

Agency: Gene Christiaansen from the Office of Public Instruction (B-310) set out recommendations to the Legislature (Exhibit 5). He stated that the difference between the budgets falls in a number of areas. The differences noted are on enrollment, the revenue estimates including the county millage, the coal tax and the use of federal funds. The property tax area differs significantly. This pointed out on page 3 of Exhibit 5 of the county millage review. The one-time transfer of the reserve amount of the coal tax trust revenue offset general fund expenditures during Special Session III, so declines sharply to this He pointed out that when considering using biennium. federal funds, they are restrictive in that they can only be used for a three year term for the same project, they require a match of dollars, and they affect only specific program areas. The center directors would prefer federal funds not be appropriated within the budget.

Discussion followed. HB39, if passed, would make changes by transferring the centers to the Board of Regents. This would be an advantage in terms of providing a state system and reducing local district tax.

Billings Vo-Tech: (7-2-A-157) Mr. Jeff Dietz, Director, said the Billings center has a stable enrollment. If there were additional funds, enrollment would increase. There is a growing interest but the center has a diminished capacity. The recommendation of the Billings center for the budget is to use the 1987 funding rather than staying with the formula. There is a serious economic situation and a projected shortfall. Short-term training is an important objective but difficult to do.

Butte Vo-Tech: Mr. Harry Freeborn, Director, (300) said the executive cuts by the governor have reduced the schools accessibility and cut instructors. If the LFA budget is accepted the budget would be further reduced. The federal funds should not be part of the appropriation. It is difficult to follow the guidelines of the Carl Perkins Act when the budget is being reduced and other funds are not available.

Chairman Nathe left the committee at 10:00 a.m. to attend to other responsibilities. Vice Chairman Jacobson assumed the chair.

The committee discussed the Carl Perkins Act. Senator Hammond asked about the reduction in the local mill levy. (588). The guidelines of the Carl Perkins Act were discussed. In definition the money must be used for the expansion of current programs or innovative programs. The money can only be used in a small part of the program for only three years.

Great Falls Vo-Tech: Mr. Will Weaver, Director, explained the turnaround and increase in enrollment over the last year. New classes and seminars were accepted well by the business community. The proposed budgets will affect the center. Five more FTE would be reduced in support areas causing less enrollment. The center has been a solution in helping turn around Montana's economy.

Discussion followed concerning the match of federal funds in instruction costs.

Helena Vo-Tech: Mr. Alex Capdeville, Director, (3-A-186) supported maintaining the present budget for 1988 and 1989. They have concerns that all three budgets puts them below the present level. The OPI proposal is more reasonable in determining the amount of federal dollars, since the federal

Education Subcommittee January 12, 1987

dollars are gradually phased into the programs, but it is still a significant cut. They feel there is an obligation to spend federal money but have concerns as to how money is appropriated. The effects of each agency's budget on the Helena Vo-Tech Center is listed. (See Exhibit 6)

Missoula Vo-Tech: Mr. Dennis Lerum, Director, (559) said the voter levy support is good. The enrollment has decreased more than the expected 1987 level. Due to the reductions, special session actions, and decreased enrollment, tuition revenue has declined. He requested the funding of the center be given at the LFA 100 percent level. This level of funding will still require some reductions but would avoid drastic levels of reduction. The center makes a direct contribution to Montana's economic base.

### (7-3-B-000)

Proponents: Dr. Carroll Krause, of the Montana University System, testified that the Board of Regents does have an interest in the governance of vocational technical education and thinks there is very strong merit in coordinating all vocational education in the state as set out in HB39. The governance would possibly be coordinated at Northern Montana College. It would be assigned as a state system under the Board of Regents. He stated several concerns, including the possible need for 4.5 mill levy at the county level and the use of Carl Perkins Act money on new things that are temporary.

Representative Peck asked how the model of HB39 compared with other states. The trend is to convert vocational technical centers to community colleges or educational centers.

Jan Norse, representing the United Councils of Vo-Tech Centers (Exhibit 7) said they did not know the long range effects of transfer to the Board of Regents but were willing to take that step. The vo-techs give quality education at an affordable price. Placements are high in the business community.

Mr. Paul Stohl, Chairman of the School Board in Helena, (217) had concerns about the current level increase in use of federal revenue. They cannot have that many new and innovative programs. They have less money and fewer students. The move for the vo-tech centers to be under the Board of Regents is a better structure and the only way the system is to survive.

ADJOURNMENT: Vice Chairman Jacobson announced the next meeting for tomorrow. For the work session, an equipment list will be provided, and, the committee will look at the

repercussion of the additional mill levy and the federal vo-ed funds. The meeting adjourned at 10:24 a.m.

DENNIS NATHE, Chairman

dt/1-12

## POSTSECONDARY VOCATIONAL-TECHNICAL CENTERS Legislative Budgeting Formula

1-12-5

### BUDGET FACTORS

Student Enrollment
System-wide average instruction cost per student full-time equivalent
Support staffing standards
Average operating cost per support staff FTE
Average compensation per support staff position
Legislative audit costs
Plant O&M program base operating costs
Variable equipment rate per student FTE

### CALCULATION OF PROGRAM EXPENDITURES

<u>Instruction Program</u> - Estimated enrollment is multiplied by a system-wide average instruction cost per student full-time equivalent for both personal services and operating expenses.

Support Program - Support staff needs are based on applied staffing standards and utilize average compensation for each position classification. Operating expenses are determined using the total number of support staff FTE and the average operating cost per support staff FTE.

Plant Operation and Maintenance Program - Custodial staff personal services are determined from staffing standards utilizing an average compensation. Each center's operating expenses are determined separately for each center from base year expenditures.

Equipment - Variable equipment (small items with a unit cost less than \$1,000) is calculated by multiplying the budgeted student FTE by the variable equipment rate per student FTE. Capital equipment (items with unit costs over \$1,000) is considered based on the requests from each center.

### LEGISLATIVE FUNDING LEVEL

Based on actions taken in Special Session III, a funding level of 95 percent of the formula was established.

Capital equipment was budgeted by the Forty-Ninth Legislature at \$31,350 per center.

Gordon Simmons
Vice-Chairman
Duane Gebhardt
Ralph Godtland
Robert Hokom
Jon Jourdonnais
Patricia Kercher
Dennis Lerum
Glenn Roush
James Schultz
Howard Williams

Avis Ann Tobin J. Melvin Williams

Chairman Nathe and Committee members, I am Bill Olfert,

Executive Director of the Montana Council on Vocational Education.

I am here to request a 1988 - 89 biennium appropriation level higher than either the Office of Budget and Program Planning or the Legislative Fiscal Analyst's Office have recommended. I request an appropriation as follows:

	<u>FY 88</u>	FY 89
Personal Services	\$ 60,998	\$ 60,318
Operations	59,002	59,682
Total	\$120,000	\$120,000

Please note that the increase requested is in the operations budget only. The requested amount for personal services remains as recommended in the LFA budget analysis.

This is a request of \$240,000 for the biennium. It is \$12,730 (5.6%) more than the Executive Budget recommendation and \$8,535 (3.7%) more than the LFA recommendation.

My brief presentation is comprised of three components:

I. An explanation of the Council and their federally mandated responsibilities.

- II. An explanation of the federal funding provisions for the State Council.
- III. The rationale for increasing the appropriation for the State Council to our request of \$240,000 for the biennium.
- I. The Carl D. Perkins Vocational Education Act of 1984 (P.L. 98-524) establishes State Councils on Vocational Education. The Act requires that Councils provide states with the evaluation, information, recommendations, and advice to assist meeting the purposes of the Act.

The role of the Montana Council on Vocational Education lies in assessing and monitoring the coordination of programs provided by the Vocational Education Act and the private sector as they fulfill nine mandated responsibilities:

- 1. Evaluate the adequacy and effectiveness of vocational education;
- 2. <u>Recommend</u> procedures for enhancing involvement of local labor and employers in local programs;
- 3. <u>Identify</u> ways to strengthen vocational education, particularly for the handicapped;
- 4. Evaluate coordination between the public and private sector;
- 5. Assess financial resources and distribution;
- 6. <u>Identify</u> private sector initiatives needed to modernize vocational education;
- 7. Assess the availability of activities and services;
- 8. <u>Evaluate</u> the adequacy and effectiveness of JTPA programs in vocational education; and
- 9. Report on the equality of access for disadvantaged, handicapped, adults, single parents, non-traditional, and incarcerated.

The State Council's additional responsibilities include advising and working with the sole state agent for Vocational Education, which in Montana

is the Superintendent of Public Instruction, to carry out:

- Development of a State Plan;
- 2. Establishment of criteria for evaluation of vocational education;
- 3. Establishment of technical committees for curricula improvement;
- 4. <u>Development</u> of adult training, retraining, and employment development programs; and
- 5. <u>Development</u> of industry-education partnerships for high-tech occupational training.

The Council also solicits input from the public through the public hearing process.

The thirteen members of the Council are appointed by the Governor and represent the following:

Seven Representatives of the Private Sector

- \* Five representing business, industry and agriculture.
- \* Two representing organized labor.

Six representative of Vocational Education (Secondary and Postsecondary)

The Montana Council on Vocational Education is making a concerted effort to carry out its responsibilities for assisting, consulting, advising, and analyzing. The reports prepared are submitted to the following:

Business Community
General Public
Governor
Job Training Coordinating Council
State Board of Education
U. S. Secretary of Education

U. S. Secretary of Labor

# II. <u>An explanation of the federal funding provisions for the State Council:</u>

- 1. The Council is funded entirely from federal vocational education funds.
- 2. Section 112(f)(1)(A) of the Carl Perkins VEA states that each Council shall be allotted a minimum of \$120,000. Fiscal year 1988 will be the first time Congress has appropriated funding at that level. For FY 87 the Council was to receive a grant award of \$116,350. Gramm-Rudman reductions of 4.3% resulted in the \$112,113 we are now receiving.
- 3. Since development of the biennium budget in July, Congress has appropriated funds enabling the U. S. Department of Education to increase our grant award to the minimum level of \$120,000 (see attached correspondence).
- 4. Anticipated revenue for each year of the biennium is \$120,000. Gramm-Rudman reductions will not affect the FY 88 grant award, but may affect the FY 89 award.
- 5. The Council has additional federal revenue available for allocation during the 1989 biennium of \$61,532. This amount will result from a carryover for the 1987 biennium which resulted from a vacancy in the position of Executive Director and subsequent reduction in activities.

Federal Revenues Available for	1989 Biennium
1987 Biennium Carryover	\$ 61,532
FY 88 Grant Award	120,000
FY 89 Grant Award	120,000 *
	\$301,532

- \* May experience Gramm-Rudman reduction.
- 6. Federal revenue available for the 1989 biennium of \$301,532 exceeds the Council's request of \$240,000 by \$61,532. A budget amendment of \$23,500 has been requested in this legislative session for the purchase of much needed office automation equipment

On approval of this budget amendment, \$38,063 of revenue will remain available to the Council. State Councils have two years to spend their grant award under the Tidings Amendment.

7. Section 112(F)(2) of the Carl Perkins Act states, "The expenditure of the funds paid pursuant to this subsection is to be determined solely by the State Council for carrying out its functions under this Act, and may not be directed or reprogrammed for any other purpose by any State board, agency, or individual."

# III. A rationale for increasing the appropriation for the State Council to the level requested:

The requested increase in appropriation will allow the Council to expand its ability and effectiveness in providing recommendations and data collection necessary to adequately assess and monitor the vocational education delivery in Montana. As a result of that increased effort, substantive information and evaluations will be provided to key policy makers.

We will utilize the increased operations budget by providing more technical assistance to secondary and postsecondary vocational education programs, on-site program evaluations, additional research projects, and greater communication with various publics.

In summary, may I reiterate three key portions of my presentation:

- (1) The federal government has appropriated these monies to the State of Montana to be utilized by the Council for the benefit of its citizens;
- (2) revenue to support the increase is available with no impact on the general fund; (3) the increase will allow the Council to be more effective and accomplish their federally mandated duties.

Mr. Chairman and Committee members, I respectfully submit this testimony for your consideration. Thank you.

DEPARTMENT OF EDUCATION
OFFICE OF VOCATIONAL AND ADULT EDUCATION

November 12, 1986

PROGRAM MEMORANDUM OVAE/DVE - FY 87 -

SENT BY: LeRoy A. Cornelsen

上 ち

Director

Division of Vocational Education

SENT TO: State Directors of Vocational Education

State Councils on Vocational Education

STATE COUNCIL ON VOCATIONAL EDUCATION

SUBJECT: Vocational Education Allotments for Program Year (PY) 1987-88

The attached table shows the estimated State allotments under the Carl D. Perkins Vocational Education Act for Program Year 1987-88, beginning July 1, 1987. The allotment figures are based on the long-term continuing resolution, P.L. 99-500, signed into law on October 18, 1986. You may use these figures for planning purposes.

In order to receive the grant award for PY 1987-88, a State must request the additional funds reflected on the attached table. This may be done in one of two ways:

- 1. If the State continues to follow the same goals, objectives, and activities as identified in the Three-Year Plan, a letter from the Executive Officer of the State Board indicating that the additional funds will be allocated according to the required formula and expended for State Plan purposes will suffice.
- 2. If any changes are made in the goals, objectives, and activities of the Three-Year or annual update, then an amendment, including a new budget summary, will be required.

Changes adopted in the Technical Amendments will be fully applicable, since the final regulations were published on July 14, 1986. These changes include:

- a. The LEP formula as revised in Section 401.96(b) of the regulations.
- b. The requirement that Consumer and Homemaking funds be expended for State leadership (Section 401.102(b)(2)).
- c. The establishment of the six percent maximum funding level for State administration under Consumer and Homemaking (Section 401.102(c)).

If these changes have not already been incorporated into the Three-Year Plan, an amendment must be submitted before the relevant grant award can be issued.

If an amendment is required, the State must follow the requirements of Section 401.21; i.e., development and adoption of the amendment(s) by the State board in consultation with the State council and review of all amendment by the State job training coordinating council and the State council on vocational education.

If you have any questions concerning this allotment table or the funding process, please contact Mr. Les Thompson at (202) 732-2450.

## TESTIMONY BEFORE EDUCATION SUBCOMMITTEE JANUARY 12, 1986

#### VOCATIONAL-TECHNICAL CENTER SYSTEM

In addition to the Executive Budget and the budget analysis, the Office of Public Instruction is directed in MCA 20-7-301(8) to transmit budget recommendations to the Legislature.

The testimony presented will follow a sequence of the Office of Public Instruction and each center director and/or board of trustee member.

The overall budget recommendation of the Office of Public Instruction reflects a current level of expenditures from fiscal 1986 for the 1989 biennium. Total amounts and distributions are found on page 2 of this testimony.

The appropriated request level is comparable to the analysis of the LFA with the following exceptions:

- 1. Property tax within the five counties differs significantly. The recent history of appropriations and actual collections is illustrated with a projection for fiscal 1988 and 1989 on page 3.
- 2. Coal tax trust revenue differs from both the Executive Budget and analysis. Actual revenue has exceeded appropriated levels over the past three years, which allowed the one-time transfer and savings of general fund during Special Session 3.

The 1987 biennium appropriation was \$1,895,000 with anticipated collections meeting 98 percent of the appropriation.

- a. The Office of Public Instruction projects a shortfall of \$143,000 or down 7.55 percent.
- b. Executive Budget projects a shortfall of \$333,516 or down 17.60 percent.
- c. LFA projects a shortfall of \$242,459 or down 12.79 percent.
- 3. Federal fund use. There are a number of considerations relative to the use of federal funds.
  - a. Center directors collectively would prefer that federal funds not be appropriated because of match requirements, restrictive language or population specific services.
  - b. Failing consideration of "a," there is a collective opinion that a match provided with general fund or other special revenue should be made available for the appropriated federal amount.
  - c. Failing "a" or "b," the request would be for fewer federal funds to be appropriated than is reflected in the LFA analysis and Executive Budget.

Consideration was given to June 1986 correspondence issued by Representative Donaldson which sought a greater use of federal funds for the centers. The recommendations of the Office of Public Instruction do reflect a greater use of funds; however, their use emanates from modifications submitted in the center budgeting process and not within current level budgets. The use of the Office of Public Instruction federal level would have an impact upon current programs unless a matching source of funds could be determined.

Finally, the use of federal funds for programs, services and activities is limited to a three-year cycle. A new program initiated in fiscal 1986 will not be eligible for funding in fiscal 1989, thereby creating a continual recycling problem that involves equipment, facilities and personnel.

4. General fund appropriation differs significantly in fiscal 1989 and it is assumed that the difference was replaced by the 25 percent increase in federal funds.

There is a major concern that the formula developed in 1983 and later refined does not work when the individual elements of the formula are not held constant. In example, if the instructional component has been determined to be at one level in a biennium and it is adjusted downward the next biennium, the formula relationship is no longer valid. The application of the formula has not kept pace with actual practice and has resulted in the increased dependence upon a local district mill levy.

A major issue is that of a potential governance change. If HB 39, as it appears or as it may be amended, succeeds in transferring the governance from the Office of Public Instruction to the Board of Regents, the fiscal decisions to be made prior to the bill passing may be less than productive.

For many years it has been charged that governance is the problem to solve and it will follow that funding will be adequately addressed. It may be appropriate to consider that sequence during this session, holding in abeyance the budgetary decisions until after governance has been settled.

Dollar Increase Percentage Inc/Dec 134.74 +.015

The final issue is that of the local district mill support for the centers. The districts have met a need to supplement the appropriated budgets for the centers since the early 1980s. In 1981 the district mill levy amounted to \$260,777. By the close of the fiscal year 1986, the support level was at \$1,613,693\* or 6.19 times the 1981 level. As a percent of each local budget, the local millage ranged from 8 to 22 percent of the center budgets, averaging 15.9 percent of the total expenditures.

Projections for 1989 biennium from the total actual expenditure level of 1986 without pay plan increases and other inflation factors would require \$3,280,000 of district support.

The increasing burden of the district levy support has played an important role in the quest for a governance revision. At the same juncture, as governance may be changed, it is an absolute necessity to address the absence of revenue provided by the districts should they be precluded from future budgetary support.

\* Does not include \$100,000 of additional support in Great Falls or the additional funds provided to meet the Governor's reduction of January 1986 for Helena.

# HELENA VOCATIONAL-TECHNICAL CENTER TESTIMONY January 12, 1987

The Helena Vocational-Technical Center would like to go on record supporting a current level budget for the Center in FY 88 and 89. The budgets submitted by the Governor's office, the Office of Public Instruction, and the Legislative Fiscal Analyst (LFA), are all below current level. The Office of Public Instruction's proposal represents a more reasonable approach in determining the amount of federal dollars for they gradually phase federal dollars into our programs.

While we strongly feel that we do have an obligation to try to expend as much federal money as possible, we have a concern as you will note in FY 89, the LFA's budget has increased the federal revenue from \$107,743 to \$310,000. Because the federal act money has to be matched dollar for dollar and the money is to be expended for new and innovative activities, we would be placed in a tenuous position to obligate \$620,000 for such activities within a current level budget. We in Helena strongly feel that we should not be changing programs to accommodate spending federal monies. While we are not opposed to change, we feel change needs to be realistic and based on program needs.

In FY 86 School District No. 1 replaced \$51,424 of the federal monies with local voted millage so we could legally spend a portion of what was appropriated.

The Governor's budget is based on our FY 87 fall enrollment which did experience a decrease; however, since then our part-time enrollment has gone up. We feel that by the end of FY 87 we should be able to generate an additional 50 FTE. The Governor's budget also does not take into consideration our prior year's enrollment, consequently it is based on an all time low allowing little flexibility for us to ever bring back an increase in our enrollment. Should you as a committee adopt the Governor's budget, the Helena Vocational-Technical Center's enrollment will continue on a downward spiral resulting in self-destruction. We could hardly maintain our enrollment with decreases in our budget over the past two years as a result of the special session and the action taken by the Governor's office.

Following we have listed the effects each agency's budget would have on the Helena Vocational-Technical Center. Thank you for your consideration.
