MINUTES

MONTANA HOUSE OF REPRESENTATIVES 54th LEGISLATURE - REGULAR SESSION

COMMITTEE ON TAXATION

Call to Order: By CHAIRMAN CHASE HIBBARD, on April 4, 1995, at 8:00 A.M.

ROLL CALL

Members Present:

Rep. Chase Hibbard, Chairman (R)

Rep. Marian W. Hanson, Vice Chairman (Majority) (R)

Rep. Robert R. "Bob" Ream, Vice Chairman (Minority) (D)

Rep. Peggy Arnott (R)

Rep. John C. Bohlinger (R)

Rep. Jim Elliott (D)

Rep. Daniel C. Fuchs (R)

Rep. Hal Harper (D)

Rep. Rick Jore (R)

Rep. Judy Murdock (R)

Rep. Thomas E. Nelson (R)

Rep. Scott J. Orr (R)

Rep. Bob Raney (D)

Rep. John "Sam" Rose (R)

Rep. William M. "Bill" Ryan (D)

Rep. Roger Somerville (R)

Rep. Robert R. Story, Jr. (R)

Rep. Emily Swanson (D)

Rep. Jack Wells (R)

Rep. Kenneth Wennemar (D)

Members Excused: None

Members Absent: None

Staff Present: Lee Heiman, Legislative Council

Donna Grace, Committee Secretary

Please Note: These are summary minutes. Testimony and

discussion are paraphrased and condensed.

Committee Business Summary:

Hearing: SB 39

SB 417

SB 421

SB 424

Executive Action: None

{Tape: 1; Side: A.}

HEARING ON SB 39

Opening Statement by Sponsor:

SEN. MIKE HALLIGAN, Senate District 34, Missoula, said the bill was derived from the Davis U. S. Supreme Court decision in which the Court dealt with the issue of whether states could tax federal retirees if it was not taxing its own state retirees. A settlement was reached with 5,600 individuals who filed timely claims. This bill deals with the other retirees who had taxes withheld illegally and did not timely file. He said the state might not have a legal obligation because the statute of limitations had been reached but there was an ethical obligation because there was a question of whether the Department of Revenue (DOR) confused people about whether they could file or not. bill allows for a credit to be given over a four-year period so that an individual could recover any illegal taxes paid. there was a death, the estate could recover all illegal taxes collected. About 3,000 individuals would be subject to the bill. The pamphlet put out by the DOR confused people. In 1989, it said "you may file an amended return" and most of them did. 1990 the language changed and said "District Judge Sherlock sustained the Department's position of denying refund claims ... relating to 1988 and earlier and an appeal to the Supreme Court has been filed. There will be no refunds on this issue until the Department has a final decision." People read that and assumed they couldn't file amended returns. The booklets for the years after that said the same thing. In 1993, when the decision was rendered, people were told to go ahead and file and by that time the statute of limitations had run out. The fiscal note is approximately \$1.9 million per year. The Senate placed a contingent voidness provision on the bill. REP. HALLIGAN said taxes that were illegally collected and should be paid prior to setting the current budget.

Proponents' Testimony:

Ed Sheehy, Helena, said he was the attorney representing those who took action to obtain refunds of illegally collected taxes following the ruling of the U.S. Supreme Court. He said all illegally collected taxes should be returned and, if the Legislature fails to do that, there is the possibility of further litigation based on the confusing information offered by the DOR. He urged the Committee to support SB 39.

Dick Hoy, federal retiree, said he would personally be affected by the legislation. He said similar legislation had been proposed during the 1993 special session and when the Legislature ran out of time and money, and there was competition with property tax relief, their cause was doomed. He said the Governor had said there was a healthy surplus in the budget for the current year and the request for tax credit should not be

可能是数据的 医内部 化氯甲酚 化二氯甲酚 整新作品 医异异性 医异异性腺素

ignored. He said the overwhelming support of SB 39 by the Senate was encouraging and he asked for strong bi-partisan support of the bill so that it would be signed by the Governor.

Herman Wittman, State President, National Association of Retired Federal Employees, rose in support of the bill. He said there had been much confusion regarding whether retirees should file claims for refunds. His organization made an effort to advise all members to file, however, many reported they were given different information and because of the "mixed signals" they did not file. Some received information from their accountants and others received information from the DOR that it would be useless to file. At the hearing, when the DOR negotiated with representatives of the federal and military retirees, those present were made to understand that they could only negotiate with those who had filed timely claims, thus, those retirees who did not file timely were excluded from the settlement. he hoped the Committee would consider the unfortunate circumstance that caused that group of retirees to be left out of the settlement and consider the tax credit because it would be fair and just.

Dennis Burr, Montana Taxpayers Association, said that testimony indicates that there were 5,000 retirees who filed timely claims and 3,000 who did not. He pointed out that these people worked for the government all their life and they trust government to do the right thing. These people expected things to get "sorted out" and, as a result, they were left out of the lawsuit because the statute of limitations had expired. The bill is fair and would keep faith with the people who trusted the government.

Tom Harrison, Montana CPA Association, pointed out that the words "illegally collected" is a phrase that comes easily and is applicable to a lot of taxes that are erroneously paid. However, this particular tax was collected unconstitutionally. The question is whether it will be the choice of the Legislature to return unconstitutionally collected tax. Other unconstitutional actions have been set aside in a hurry. He said the message that would go out would be that because of legal hurdles that were placed in the way, the state would benefit from the unconstitutional collection of taxes. He said he hoped that would not be the message and he asked the Committee to support the bill.

Opponents' Testimony:

Mick Robinson, Director, DOR, distributed copies of a "Recap of Federal Retiree Lawsuit and Refund Process," together with copies of news releases and other information pertinent to the federal retiree lawsuit. EXHIBIT 1. He said the issue was addressed in the 1993 special session and the DOR was directed to enter into settlement discussions which they did. They contacted retiree groups and set up meetings. One of the reasons the DOR opposes this legislation is based on the settlement discussions.

The first question that was addressed was how to include the federal retirees that did not file a timely return. representatives of the retiree groups said they did not need to consider the retirees that did not timely file because they had their opportunity and did not take advantage of it. year limitation is a very important consideration in tax law. Mr. Robinson referred to the press releases that had been issued by the Department which stated, "Taxpayers with federal pension income in 1983 should act now to preserve their right to a possible refund. The last day for filing a claim for refund for the 1983 tax year is Saturday, April 15, 1989. Claims for 1984 and later years are not due until April 15, 1990 at the earliest. Please file all claims on a Montana Amended Form 2X." message was consistently issued by the Department through press releases. Mr. Robinson said he would agree that confusing advice had been issued, although not by the DOR. He said he had asked individuals to give him copies of any confusing information the Department had issued and he had received none. misinformation came from the organizations representing retirees The removal of the five-year statute of limitations in this particular situation would make it easier to remove in future activities also. In the settlement discussion, Mr. Sheehy and Mr. Wittman testified as proponents regarding those who had not timely filed and, with the exception of one representative of the federal retiree groups, there was no attempt to include those who had not timely filed. If there had been any indication, the settlement would have been quite different from what was agreed The DOR and the Governor were acting on the understanding of all members of the discussion that it would be a final settlement, including all issues regarding the federal retiree situation. For the reasons given, the Department opposes the legislation.

{Tape: 1; Side: B.}

Questions From Committee Members and Responses:

REP. HARPER said he saw a letter sent to a federal employees advising that he could file an amended return for one year and he later found that, because he had not filed for the other years he was ineligible. He said he had read it carefully and it seemed to him that the Department's message was "this is the only year we screwed up on" a tax form for one year was included. He asked if the Department was aware of such a letter. Mr. Robinson said there were a number of situations that were taking place with federal retirees at that particular time in determining how individuals would file their returns. Many CPAs and individuals who, in 1989 after the Davis decision, filed amended returns for all of the years 1983 through 1988. Others were filing on a year-to-year basis. He said he did not know which letter was being referred to. In the fall of 1993, a letter was sent out regarding 1988 and that might have been the letter. That year stood alone because of the type of information that was given That tax return had not been filed by taxpayers at the time The Control of the Co

of the Davis decision so the information given to those individuals was "go ahead and file a return for that particular year, include retirement income, etc., and when this is settled, file an amended return."

REP. HARPER asked if Mr. Robinson would agree that receiving a letter from the Department with a form for one year would indicate that the individual should only file for one year. He said that was the message he received from reading the letter. Mr. Robinson said that if the letter he was referring to was the letter that was mailed in the fall of 1993, the only reason there was one tax return was because it was the only year where the statute of limitations had not expired and the letter clearly indicated that.

REP. ELLIOTT quoted from the statement on the 1991 tax form which said, "Until the Department has the benefit of these Court decisions, no refunds for these earlier years will be issued." He asked if that statement would encourage anyone to file an amended return for tax years 1985 and up. Mr. Robinson said it would because it would protect the right to receive a refund. He said retirees were aware of the situation. REP. ELLIOTT said, however, if the individual for some reason was not aware of the 1989 communication, he did not think the language would encourage the average person to file an amended return. Mr. Robinson said he supposed the argument could be made. He said the Department probably could have done a better job of providing information. In addition, there were numerous newspaper articles. REP. ELLIOTT asked if there were press releases in 1991. Mr. Robinson said there were not.

CHAIRMAN HIBBARD said the sponsor had referred to confusing information in his opening statement and presented examples from 1989 and 1990 and Rep. Elliott had presented an example from 1991. Mr. Robinson subsequently testified that he feels the Department was fairly consistent in what they told people in terms of filing. He asked the sponsor to expand on his interpretation of what may have been confusing or ambiguous. SEN. HALLIGAN said that when a number of CPAs misread the actual tax booklet and misinterpreted the information from the Department, it would make a good argument that there was confusion on the part of the taxpayers. The confusing information was included in the tax booklet for four years and people did not file. The news releases appeared in only four or five of the larger urban newspapers. There were major gaps in news coverage. He said it would not be an issue if there were isolated cases of individuals who did not file, but there is agreement between the CPAs in the state that there was confusing information in the tax booklet and led people to the conclusion that they should not file until the court had made its decision.

REP. ARNOTT asked how much money had been spent in an effort to inform people of the need to file an amended tax return. **Mr. Robinson** said the first attempt was through a press release

indicating the need to file an amended return for which there was no cost. They did not buy advertising space in newspapers. He had no account of time and other resources used in meetings with CPAs or other training costs. REP. ARNOTT said the fiscal note includes \$11,000 for postage and mailing information to potential applicants. She asked if that would "finally put this issue to rest." If this amount is to be spent on 3,000 people, she asked why more of an effort was not made initially. Mr. Robinson said it would be difficult to separate the federal retirees in their files from all others. Once they receive an amended return from a federal retiree, they are placed on a mailing list and there were a significant number of mailings that did go out.

r ·

REP. ROSE asked when the cut-off date would be. SEN. HALLIGAN said it would be four years from the coming tax year. REP. ROSE asked what would happen if all the retirees did not file an amended tax return. SEN. HALLIGAN replied that SB 39 would provide an opportunity for filing and contains a specific statement that says it is a "window of opportunity" that would be closed after a specific date.

Closing by Sponsor:

SEN. HALLIGAN said the federal retiree organizations had tried to get information to retirees, but if an individual did not belong to an organization, and did not see the press releases, they probably would not have heard about the need to file a return. The decision was made on April 10 and tax returns were due on April 15 and many people did not see the press releases. The problem was reasonable notice to citizens whose taxes were unconstitutionally collected. The state's obligation would be rectified by SB 39. He said he would like to see the contingent voidness provision removed from the bill and he would be willing to work with the Committee if it had other ideas for taking care of the situation.

{Tape: 2; Side: A.}

HEARING ON HB 417

Opening Statement by Sponsor:

SEN. THOMAS F. KEATING, Senate District 5, Billings, said that HB 417 provides for a property tax deduction for business property to be phased in over a period of three years. The property involved is all Class 8 property, business equipment and machinery. EXHIBIT 2 is a listing of the market and taxable values for all property and the estimated taxes levied for Tax Year 1994. He referred to the list of Class 8 property and noted that the tax rate was 9%. EXHIBIT 3 shows the growth of Class 8 property tax from 1990 to 1994 by county and by city. He said there were winners and losers but the average annual growth was 3.6%. He said that figure would be the reference point when dealing with the formula.

Overall, there is approximately \$80 million worth of Class 8 personal property. Furniture and fixtures, manufacturing machinery and other machinery, and ag implement are the largest categories and they all deal with business -- manufacturing, fabricating, furniture and fixtures are in retail businesses and offices throughout the state. Examples would be checkout counters, freezers, everything throughout a store that holds the food and fixtures and would be subject to 9% tax. Obviously that tax is passed through to the consumer in the price of groceries. When the Legislature gives a tax break, they do not necessarily give the break to a business to be set aside as profit. have some options to do something with that tax reduction -bring down the price of the goods in order to sell more, give the consumer a better price to be more competitive in the market or they can add salary to the payroll or put it towards their profitability. He said the tax rate would be reduced from 9% to 8% beginning January 1, 1997; from 8% to 7% in 1998; and to 6% in 1999. The formula would be based on the 96 mills so property tax relief for 1997 would be the difference between the 1996 tax and the 1997 tax based on 96 mills. SEN. KEATING then explained how the reimbursement formula for counties would work.

SEN. KEATING explained that the bill provides for an advisory committee to be appointed to study property tax structure for the next two years, the goal being to develop ideas or recommendations for real property tax reform for consideration by subsequent legislative sessions.

SEN. KEATING advised that amendments were added on the Senate floor dealing with bonding limits. As property tax rates go down, the amount of property tax for collateral would be increased in order to protect the ability of the taxing jurisdiction to obtain bonds. Tax increment districts are protected with special language in the bill.

The sponsor asked the Committee to consider that for tax year 93-94 on Class 8 property, the increase in taxable valuation was sufficient to offset a 1% rate reduction. If the tax rate would have been dropped from 9% to 8%, the growth in property between 93 and 94 was sufficient to equalize the reduction in rates. There would have been a slight loss to taxing jurisdictions. purpose of the bill is to stimulate growth. If that happens, the reduction of the personal property tax rate would stimulate investment and growth, and real property would also grow. jobs would mean people have to have places to live. SEN. KEATING said he had heard that the reason there weren't more jobs in industry was that property tax on equipment was a disincentive to If the personal property taxes are lowered, there should be more equipment, more jobs, and more productivity. He commented that "if you want more of something you subsidize it and if you want less, you tax it." If the tax is reduced and investments are made, it will mean more jobs. If there are more jobs, there will be more income tax revenue for the state. productivity can be increased through this measure, it will

increase the tax base, increase revenue, stimulate commerce and, "if the textbook is right" it should benefit the state. He encouraged the Committee to give SB 417 due consideration.

Proponents' Testimony:

Mick Robinson, Director, DOR, testified in support of the bill on behalf of Governor Racicot. He said everyone was familiar with the 9% personal property tax in Montana and recognize that is high, compared with surrounding states. It is a disincentive for buying a new piece of equipment and it is a major factor in determining where a company will locate.

Dennis Burr, Montana Taxpayers Association, spoke in favor of the It is an economic development measure and there is also an element of fairness to the bill. He said it should be reduced to make it comparative to the rate for residences and improvements. He did not agree totally that it was an economic development bill because, even after the tax is fully implemented at 6%, the tax would still be higher than the rate in surrounding states. would make it easier for the people in Montana to update their equipment but he was not sure that it would convince anyone to bring their property to Montana. He said he felt strongly that the effective date should be moved up into the current biennium to make it effective during the time this Legislature is in control. He said he also had some concern about the reduction in reimbursement to local governments. He said the reduction of revenue to local governments is significant, but considering that the property tax base is growing, it will not devastate local governments. He strongly encouraged the Committee to support the bill.

David Owen, Montana Chamber of Commerce, said there is a need to start Montana moving toward a different tax structure and he urged the Committee to move the effective date to 1996.

{Tape: 2; Side: B.}

Mike Mathew, Yellowstone County, said he would support the bill even though it would have a big impact on Yellowstone County and he was not satisfied with the reimbursement formula. It will have serious concerns for local governments; however, the tax rate must be lowered.

SEN. LARRY TVEIT, Senate District 50, Fairview, rose in support of SB 417 and said he would prefer to see the effective date moved forward. He said he had made an attempt to repeal the tax, but the price tag would have been \$87 million. He did think it would be possible to find \$11 million in 1996. The personal property tax rate is significantly higher than in surrounding states and has been identified as a major impediment to operating a business in Montana. In the long run, the loss of tax revenue would be offset by business expansion, businesses remaining in the state, and new businesses locating in Montana. He said the

recommendations of the Governor's Task Force were to educate the public that the tax is a business equipment tax and not a tax on personal property and to work for passage of tax elimination or reduction in the 1995 session of the Legislature. The bill would be great for business in Montana.

Ernie Dutton, Montana Association of Realtors, spoke in support of the bill because it would encourage economic development. He also pointed out that evasion of personal property tax is higher than on any other tax and if the tax were more reasonable, there would be more compliance.

Steve Turkiewicz, Montana Auto Dealers Association, said that in today's competitive environment, state of the art equipment and tools are an absolute necessity, not a luxury. Whether a dealership is large or small, they all need the same equipment. Therefore, he asked the Committee to concur in the bill and support moving the effective date to the present biennium.

Don Allen, Montana Wood Products Association, testified in support of SB 417. He said that in order to survive with the limited supply of timber to be taken from federal lands, it is necessary to refurbish and replace equipment in facilities throughout the state. The equipment is expensive and it is needed in the small mills as well as the large mills because they must expand in order to survive. He said the bill is badly needed.

Lorna Frank, Montana Farm Bureau, said she would like to see the elimination of taxes on farm machinery and equipment but that would not be likely to happen; therefore, they support the reduction. A decrease of 1% per year is not much but it would be a beginning and would allow people to increase production. She would also support the amendment to move the effective date up.

Bob Stephens, Montana Grain Growers Association, spoke in support of the bill and the amendment to move the effective date up.

Jennifer Hill, Montana Stockgrowers and Montana Woolgrowers Associations, stated that both organizations support SB 417.

John Augustine, Conoco, Inc., spoke in support of the bill. He said that during the past six years Conoco has spent \$300 million for pollution control equipment. Every time they are forced to make changes because of state or federal regulations, it takes a lot of money.

Rex Manuel, Cenex, pointed out that this excessive tax is maintained by inflation and high market value and it doesn't take too many years to pay out the purchase price. He urged the Committee to pass SB 417.

ika mandan jerebelika melangan pelangan belanggan pelanggan dibibagai

Opponents' Testimony:

Don Waldron, Rural Education Association, admitted that the bill was well thought out, well written and understandable. However, he pointed out some concerns. He said the "growth pattern" mentioned by the sponsor is what the small schools survive on. The schools must have growth in order to pay the increases in utility bills, salaries, and other costs. He said he realized that if the tax is reduced there would be a chance for greater growth. There were cuts of \$19 million in 1993 and the school districts have not received that back yet and now the legislation says the state will reimburse the schools \$66 million over the next three years which would go a long way toward giving back what was promised to the schools. He encouraged the Committee to consider the balance. He said he had trouble understanding the reimbursement formula as outlined in the bill.

Eric Feaver, Montana Federation of Teachers and Montana Education Association, rose in opposition to SB 417. He said he would concur that the personal property tax in the state is punitive and maybe it should be reduced, maybe it is necessary for job growth, maybe it is difficult to assess and administer, and maybe if it is reduced there will be more jobs and maybe more tax will be collected -- and maybe not. It is a "black hole" bill and will put a hole in Montana's tax base because that is what happened in 1981 when half the tax base was lost. It may mean an inevitable shift of tax burden from personal property to residential property taxpayers which will aggravate the antiproperty tax fervor in the state. It could lead to more initiatives and petitions to attack the property tax base. may endanger a fair and adequate property tax base for schools, cities and counties. He urged the Committee to consider that the "maybe's" might not be positive.

Dean Harmon, Roosevelt County, said he was a farmer and was impressed when he read that all agricultural equipment would get a tax break. However, he recognized that 60% of the taxes he pays go to the local schools and he accepts that responsibility; therefore, he opposes the bill. Mr. Harmon also presented written testimony from Phillips County expressing opposition to the bill. EXHIBIT 4.

Don Judge, Montana AFL-CIO, said the bill sounded like the old "trickle down days," provide enough money to those at the top and there will be jobs for those at the bottom. He said this had been tried with the coal tax a few years ago and no jobs were created as a result. What that did happen was it shifted the tax burden away from the coal corporations and over to the homeowners in the State of Montana. The tax was reduced from 16% to 9% and no new jobs were created. Business personal property taxes have a habit of becoming depreciated while homes are appreciating in value. When the value of a house goes up, the taxes do not go down because of depreciation. In addition, homeowners do not receive any income from their homes and the purpose of business

equipment is to produce income. He said there is a difference -personal property taxes and residential taxes are not the same.
He said the bill would encourage another push for a sales tax a
few years down the road. He said the bill was not a good piece
of legislation because it does not take care of or recognize the
needs of local governments to provide adequate services to the
citizens they serve. He said something should be done about
personal property tax but this bill was not the answer.

Larry Fasbender, Cascade County Coalition, stated that he could sympathize with the people supporting SB 417 because there is a need to do something about personal property tax. He said his problem with the bill was the reimbursement formula. The bill would create a problem down the road because there is no way to determine how the overall effect of taxable valuation will impact on cities, counties and schools. Different counties would be impacted differently and that would be a major flaw in the legislation. Growth would not take place evenly across the state and some local governments would have major impacts. He also noted that a tax shift would eventually have to occur. He suggested that the Committee find some way to correct the problems in the bill before it is passed.

{Tape: 3; Side: A.}

Michael Keating, Montana School Boards Association, said he would not argue that the business equipment tax in Montana is too high. He disagreed with the sponsor's statement that the economic stimulus provided by enactment of SB 417 would make up for the losses in tax revenue. This means there would be an eventual significant loss of revenue to local governments and schools which would be shifted to homeowners. He asked the Committee to "do not concur" in the bill.

Gordon Morris, Director, Montana Association of Counties, said he had data to support the fact that a growth rate of 3.5% would not keep pace. He said MACO does believe in tax reform but the bill is not tax reform -- it is a tax advantage that would be paid for by someone else. Mr. Morris provided an analysis of the reimbursement formula which he had generated from his own personal data. EXHIBIT 5. He said the total price of the bill over the next ten years would be \$331.9 million which future sessions of the Legislature would have to deal with. He urged the Committee to do not pass SB 417.

Alec Hansen, Montana League of Cities and Towns, recalled promises made by Legislatures in the past which promised reimbursement to local governments that was never received because of a lack of revenue. He said he could see the same thing happening with SB 417. He said the economy in Montana is "as wild as the weather" and there are no guarantees that there will be money to reimburse the cities, counties and schools for the cost of the bill.

Jim Kembel, City of Billings, spoke in opposition to the bill on behalf of Mark Watson, Billings City Administrator. If SB 417 is passed, it would have a major negative financial impact on the City of Billings. A copy of a letter from Mr. Watson is included with these minutes. EXHIBIT 6.

Kathy Bessette, Hill County Commissioner, said the counties are promised reimbursement but, if the money is not appropriated, they will never see it. She asked the Committee to vote against SB 417.

Informational Testimony:

Ken Morrison said he was neither an opponent nor a proponent of SB 417 because there were excellent arguments on both sides that were well-founded. He said that as he looked at the classification system, he wondered whether fairness ever applied because there are always higher rates and lower rates. He said that situation invites "tinkering" and in this piece of legislation the Committee is being asked to tinker with the classification system. He encouraged the Committee to look at all classes and not just examine this one situation. For example, he said Class 9 property is taxed at 12% and it contains a great deal of personal property and there is no discussion of lowering that rate. He suggested that the Committee look at the entire system and develop a long-term plan for making it fair. Choosing only one area would cause problems for future Legislatures.

Questions From Committee Members and Responses:

REP. ELLIOTT asked if utility personal property would be reduced by the bill. Mary Whittinghill, DOR Property Assessment Division, said it would not, because utilities and railroads are in a separate class which is an average of all commercial and industrial property. REP. ELLIOTT asked what the utility companies would do if everyone else got a tax break. Ms. Whittinghill said she couldn't comment on that. REP. ELLIOTT asked if it was a possibility that they could sue to get their rates lowered. Ms. Whittinghill said there would be that possibility.

REP. ELLIOTT asked if the last five years had been economically extraordinary times in the state. Larry Finch, Economist, DOR, said he would agree that the last three years had been good in Montana. During the last year there was a growth rate of 8% in personal property tax valuation. The average over the past five years was 3.5%. REP. ELLIOTT asked what the growth rate was in 1986. Mr. Finch replied that it was a negative 9%. REP. ELLIOTT pointed out that the growth rate of personal property over the past ten years was 1.2% compared with 3.5% over the past five years.

REP. REAM asked what the tax rates were prior to 1974. Mr. Burr explained how rates were set under the old Board of Equalization system when there were only four or five classes and the Board had statutory authority to make changes. Residential property and personal property were in the same class but mill levies were much lower. REP. REAM asked if it would be wise to go back to the system that was in place in 1974, where commercial property and business equipment were all at the same rate. Mr. Burr said it would be a possibility but many people who have business equipment do not have commercial property.

- REP. WELLS inquired about the reference that had been made to evasion of this tax. Mr. Robinson said he could not estimate how much tax was not paid because of evasion. He said the Department was trying to work in the direction of auditing but, if the tax rate is lowered to where it was not considered punitive, there would be less evasion.
- REP. WELLS said the proponents had addressed the incentive for investing in business equipment. He asked if taxes were reduced whether the wood industry would use the incentive to invest in new equipment, expand business and create jobs. Mr. Allen replied that it would enable the wood industry to keep the jobs they presently have. He noted the closure of three large mills in recent months while others have had to cut back shifts. It would allow companies to stay in business.

{Tape: 3; Side: B.}

- Mr. Allen said he did not know if it would increase the number of jobs in the wood industry but it would make it possible for the companies to re-tool because those who cannot do that would be out of business. If an adjustment can be made in the "bottom line," the small operators in particular could remain in business.
- REP. SWANSON asked for help in understanding the reimbursement formula. Mr. Fasbender said that local governments would be reimbursed for the losses they experience the first year the legislation goes into effect. Any growth that takes place would not be reimbursed during the ten-year phase-out program. REP. SWANSON asked what would happen if there was a decline in the assessed value. Mr. Fasbender said the counties would not be reimbursed for any loss of property that went off the tax rolls. They wouldn't be reimbursed under the existing law either. REP. SWANSON said there seemed to be an assumption that jurisdictions that have growth would be able to handle the decline in tax revenues eventually but for the jurisdictions that were declining in growth it would be "too bad." Mr. Fasbender said that was why he had pointed out that the bill would have a different effect in different counties.
- **REP. SWANSON** asked what sort of product the sponsor could see coming out of the advisory committee and why there was no

reference in the fiscal note to the committee or appropriation in the bill to cover expenses. SEN. KEATING said he expected the committee to study the current property tax structure and its impact on the state, counties and communities and make recommendations for improvements to the tax structure because it has been criticized quite heavily. He said he had no answers to the questions about funding. Mr. Robinson said the composition of the committee would be representatives of local governments and, with the exception of two general public members, would be reimbursed for their time by the government they represent. DOR felt the agency could pick up the expenses for the members from the general public so an appropriation would not be necessary. REP. SWANSON asked if it was expected that the Legislative Council could cover their costs without an additional appropriation. Mr. Robinson said legislative members serving on committees are reimbursed through the legislative budget and staffing would not be an additional expense.

REP. BOHLINGER asked Mr. Burr to comment on the economic development issue that there should be job growth. Mr. Burr said economic growth would be marginal because the reduction of 1% would not place Montana in a competitive position with surrounding states. He said there might be some turnover of older equipment. Mr. Burr commented that whether it promotes economic growth or not, reduction of the tax was still the proper thing to do.

REP. ELLIOTT stated that it was possible that this might work and possible that it might not work because the economy might get better without lowering the personal property tax. Figures from the Legislative Fiscal Analyst's office, projected to the year 2010, if there is no growth, will be over a half a billion Looking at the worst case, he asked what would happen if there was no growth. SEN. KEATING replied that in the mid-80's there was a \$100 million shortfall which required a special session and the oil and gas industry was blamed because their revenues declined by \$10 million but, as they looked at the income tax revenues, there was a shortfall of \$35 million from income tax which indicated that a lot of jobs and industry had been lost. A study of property tax indicated a decline in property values at the same time. He said his opinion was that there had been a decline in the state of one-half of one percent overall. Yet, the state survived. There were cutbacks and money was cut from where it was not needed and the economy began to improve. He surmised that the state would still be surviving in 2010 as well.

REP. ELLIOTT said he was more concerned about the cities, towns and school districts. He asked if there was any guarantee that could be made to assure that they would be made whole. SEN.

KEATING said he could not guarantee it. The purpose of taxes is to provide the services the taxpayer wants and that is what the local governments are talking about when they say they don't have the money, yet the money comes from the taxpayers who want those

services. To say that changing the tax structure is taking money away from a city or town is in error. **SEN. KEATING** emphasized that the rate of personal property tax on business equipment has a tremendous impact on where the property will be located. He provided a list of examples of businesses and industry leaving the state because of the tax imposed in Montana.

REP. ELLIOTT asked if the sponsor would agree that not all counties will gain from the reduction of personal property tax. **SEN. KEATING** said he could not say that all counties would benefit.

Closing by Sponsor:

SEN. KEATING said the bill is far-reaching because it impacts everybody, everyplace, and would be hard to assimilate into a simple package that says "Boy, this is a good deal." It is a risky thing because there are no guarantees in the formula. He pointed out some things the Committee might want to consider in the overall proposal.

{Tape: 4; Side: A.}

SEN. KEATING said, "We are talking about \$80 million of total tax revenues and we are talking about reducing the rate of tax from 9% to 8%, which is 1% so we are dealing with is a reduction of less than 2% of the total property tax. The \$11 million per year is roughly 1.5% of the total tax revenue. So we aren't talking about an awful lot of money, not a big impact on anyone." The question had been asked whether the counties would lose all their growth and the answer was that they would not. The reimbursement is based on Class 8 property and that is the only place that growth would be flat. If there is an increase in residential or other real property, that growth in tax base and revenues would not be affected. The bill deals with less than 2% of the total property tax base. When property taxes were at 12% on the Columbia Falls Aluminum plant, he said he had a tax reform bill that would have eliminated personal property tax. He recalled that Columbia Falls asked for a reduction in their personal property tax so they could stay in business. They were put into a different class that went from 12% to 3%, a 75% reduction in personal property tax, and they were able to stay in business in Adjustments in personal property tax do have an effect on business. He said the W. R. Grace Company moved out of state because of property taxes, with a loss of two or three hundred He provided an example of another company who in the mid-80's asked for a personal property tax reduction. He said he carried a bill that would have repealed personal property taxes which did not pass and, as a result, the company opened a new plant in Bonners Ferry, Idaho, and doubled the size of their operation and the jobs and investments were lost to Montana. There are numerous examples along those very same lines. important to remember that the rate of tax is not the only factor in the formula. The number of mills is very important in the

formula but SB 417 only talks about changing the tax rate and does not deal with millage. SEN. KEATING referred to the opponents' testimony regarding the effect on schools. would affect \$8 million of the total school budget of \$960 million which is a tenth of a percent that would be impacted by the bill and \$8 million would be going back to those schools under the reimbursement formula so there would not be a big loss. He said the rural schools might have a little more concern because they don't have a manufacturing and equipment base but do have a lot of ag equipment and farming equipment and trucking. He said some schools would have to adjust but "some are overspending anyhow." He mentioned that when John F. Kennedy was president in the 60's he said that if tax rates were lowered, revenues would increase, and they did. Congress reduced income tax rates, revenues did increase, and the "trickle down" concept worked. A comprehensive study of the trickle-down economics of the 1980's revealed that every bracket of income increased. study was done at Bozeman which revealed the same thing. **KEATING** stated that the bill may not be a panacea but it would be an expression to industry that the Legislature is setting a trend. By the end of the third year, personal property taxes would have been decreased by 30% and that could have an impact on whether there is investment in Montana or not. SENATOR KEATING said SB 417 is the Governor's package and the Department of Revenue wrote it. He said he believes in it and thinks it will work and he asked the Committee to support it.

경험 음성에 돌아보다는 것은 것 같아. 전기 나는 그녀는 아들이 되는 것 모두 지난 한다. 이 경험하다는 사람들은 다

HEARING ON SB 421

Opening Statement by Sponsor:

SEN. JOHN HARP, Senate District 42, Kalispell, stated that SB 421 would freeze property taxes at the 1994 level. He said he would be offering amendments to the bill. EXHIBIT 7. He said opponents to the bill were mainly people associated with schools, grades K - 12, who receive 60% of all property taxes collected in the state. He said the taxpayers, who have lost confidence in the system, were not represented at the hearing. The bill tries to reenact I-105. He said the basic purpose of I-105 was thrown out in 1989 because of the Supreme Court's finding regarding funding of schools. When Class 1 and 2 properties were taken out of the property tax, some counties in eastern Montana "were destroyed." It dramatically changed school funding and, at the same time, that is where the taxpayers lost faith with the Legislature of Montana. They still think I-105 is in place and don't understand why their property taxes aren't frozen and they have never connected what happened in that special session of 1989, resulting in discontent in government, encouraging initiatives and a continual opposition to the institution called "government." The people who oppose the measure should be proponents of the bill because I-105 is still "on the backs" of local governments. If they would look at the provisions offered in the bill and fully understand them, they would not oppose it.

He said the people who oppose the bill will "give you a million reasons" why a freeze should not be put in place and why there should not be changes in tax policy. The reason they should support the bill is that he was convinced that if property taxes continue on as they have, they will be taken away. The people who are seeing increases in property tax, \$114 million in the last two years, will not continue to pay those increases without going to initiatives. SEN. HARP said he had worked with the Office of Public Instruction and local governments and the bill allows for flexibility. He briefly reviewed the proposals contained in the bill and the amendments made in the Senate. mentioned that the reason the schools are so opposed to the bill is that when the next reappraisal is done, there will be another \$50 to \$60 million increase in tax and SB 421 would offset those increases by lowering the mills. Therefore, the dollars would remain constant and the schools object. However, at this point in time "the taxpayers need a chance to catch their breath."

경제사용 생활용상이 되고 있는 것이 있는 집에는 이렇게 하게 하는 이렇게 만들어 잃을 이고 전하고 되고 있다. 중국이 이외국

{Tape: 4; Side: B.}

SEN. HARP SB 421 would help hold the line on property taxes and keep them from being taken away by an initiative.

Proponents' Testimony:

Ernie Dutton, Montana Association of Realtors, testified in strong support for caps on property taxes in Montana. His comments and supporting documents are attached. EXHIBIT 8.

Dennis Burr, Montana Taxpayers Association, said his main interest in SB 421 stems from the time he spent traveling around the state during the past summer involved in discussions of CI-66 and CI-67 with voters in Montana. Everywhere he went, people who tended to support the constitutional amendment to do something about taxes referenced the Legislature's actions with regard to The voters looked at I-105 as an effort to limit their property tax. Unfortunately, because of the court decision on school funding, the Legislature had to start "chipping away" at I-105 to exclude schools from its provisions. In addition, the state imposed its own 45-mill levy to help fund state schools. The public holds a tremendous amount of anger with the Legislature for changing a measure that was passed by the people "before the ink was even dry." SB 421 attempts to restore some of the provisions of the initiative although there are significant differences. Mr. Burr explained how the bill would affect schools and why some counties would prefer to remain under the provisions of I-105 using the 1986 values rather than 1994 values. He said the bill was good legislation as far as restoring trust in the legislative system with the taxpayers in Montana and, at the same time, it would not cause much harm to local governments.

David Owen, Montana Chamber of Commerce, said he had participated in many discussions on CI-66 and CI-67. The perception of the

taxpayers is that there are no answers regarding high property tax and they are concerned. The Chamber favors the provision in the bill that offsets increases in valuation against millage. The bill would go a long way toward restoring the public's respect.

Collin Bangs, Montana Association of Realtors, said the citizens of Montana have sent a strong message that they don't want property tax increases. He supports the bill because he is afraid of what will happen if it does not pass. He said the taxpayers should be given credit for making a good decision and the Legislature should reimpose that decision.

William Spilker, said he liked the part of the bill that provides that when valuation goes up, mill levies would go down. If taxes must be raised, it is appropriate to go to the electorate. He asked the Committee to vote for the bill.

P. C. Musgrove, President, Montana Association of Realtors, testified that the citizens in the Flathead are angry that I-105 did not do what it was intended to do. This bill would go a long way toward curing the problems. He urged the Committee to pass the bill.

Maureen Oelkers, Helena Board of Realtors, spoke in favor of the bill on behalf of the members of the association.

Bonny Milligan, Bozeman Board of Realtors, expressed her support for the bill.

John Shontz, Montana Association of Realtors, referred to information provided to him by the DOR on total taxes levied in Montana. EXHIBIT 9. He said property taxes are a statewide problem, not just a northwest Montana problem. During the last election, Initiatives 66 and 67 did pretty well because people are justifiably concerned that if the Legislature does not address the issue, there will be a "revolution." If the Legislature does not pass this bill, he suggested that they give serious thought to including funding in HB 2 to pay for the struggle in the next election to defeat petitions that will be on the ballot. He said he approved of the provision in the bill to offset increases in valuation by decreases in mills and the provision to allow local government to make decisions to fund large projects. He encouraged the Committee to pass the bill in order to prevent a revolution.

John Younger, Montana Farm Bureau, said I-105 was conceived by the people to be a means for control of growth in government because they had lost faith in what the Legislature did. He compared the Legislature to kids -- when the oldest starts to lose, he changes the rules, and that is what happened with I-105 and the reason SB 421 should be passed.

Opponents' Testimony:

Kathy Fabiano, Supervisor of Fiscal Operations, Office of Public Instruction, said SB 421 raises a number of questions regarding the administration and application of school budgeting laws under the combination of the bill and the provisions of Title 20. The amendment offered by Senator Harp would answer a lot of the questions. She asked that, if the Committee does vote for the bill, they would also support the amendments. The text of Ms. Fabiano's testimony is attached. EXHIBIT 10.

{Tape: 5; Side: A.}

Gary Buchanan, Chairman of the Governor's Task Force to Renew Government, advised that he was speaking in his own behalf and not as a representative of the Task Force. He said the Task Force had identified a system that rewards administration and costs and penalizes direct services and that is the theme that is being heard. Another point that was raised was that the state has over-restrained local governments, by micro-managing the way they govern themselves by detailed and voluminous laws, rules and regulations. He said the state's concern for unfunded mandates is genuine. He said the Task Force made only one recommendation in the taxation area and that was for a local option tax as a way for local governments to reduce their reliance on property taxes. It did have some support but didn't make it through. He said Initiative I-105 had asked the Legislature to reduce property taxes and in so doing present alternatives. He said he didn't think the Legislature should penalize the only fiscally disciplined sector of state government, the cities and counties. Taxes should be dealt with "straight up." A freeze is a sign of surrender on the part of a Legislature that cannot find a way to provide tax relief.

Mona Nutting, Chairman, Carbon County Commissioner, asked the Committee to table SB 421. She stated that Carbon County had been singled out and she had not come with the intent of crying and whining. She distributed copies of the county's budget for FY 86-87, 89-90 and 94-95. EXHIBIT 11. She noted that their valuations have declined since 1986 and total property tax revenues are \$193,000 less than what they were in 1986. pointed out that the bill does allow for adjustments due to high costs of remodeling and new construction, but Carbon County is neither a commercial nor an industrial growth area, yet they do have a generous residential growth history. She said that in 1994 Carbon County had \$6 million in new construction which equalled only \$17,000 in new tax revenues. The tax is offset by the cost of providing services to the areas of growth. Carbon County has never been able to pass a special mill levy for any purpose. She said the proponents say the taxpayers are "sick and tired" of increases in property taxes and that the 1986 tax freeze should be resurrected. It was also stated that the only group of people who were not represented were the taxpayers -she said they are all taxpayers and, as a taxpayer, she expected

police and fire protection and good roads. She asked that the Committee not make it harder by passing SB 421.

Mike Mathew, Yellowstone County Commissioner, said SB 421 is bad tax policy. Yellowstone County has never supported repeal of I-105 and it should be left in place. The bill changes the provisions of the initiative and would create a myriad of problems for local governments. His major concern was the removal of the reappraisal process. Inflation is a fact of life. New growth does not address inflation, it means new services must be provided. They must also deal with unfunded mandates and he provided two examples where the county must hire additional personnel because of action of the current Legislature for which they received no funding. He said Yellowstone County has lived within the scope of I-105 and they should be given the opportunity to continue to do that.

Dorothy Cody, Roosevelt County Commissioner, said Roosevelt County had lost valuation over the last nine years and during that time it has been very conservative. Speaking for the taxpayers, she said consideration should be given to the fact that if the Legislature wants taxes lowered, it is responsible for repealing the laws that require counties to provide services. That is how government is cut. She said she was surprised the realtors were testifying in favor of the bill because they are the biggest users of courthouses in the State of Montana.

James Loftus, Montana Fire Districts Association, went on record in opposition to the bill.

Dennis Parman, School Superintendent, Shelby, presented testimony in opposition to the bill on behalf of twelve schools in North Central Montana. EXHIBIT 12. He stated that even though SB 421 is amended, many school districts across Montana will have to hold another election.

Tom Cotton, Superintendent, Deer Lodge Elementary School District #1, said he represented the schools in the Underfunded Coalition who brought suit against the State of Montana twice. He commented that per pupil expenditures are down, the reliance on property tax has increased and state funding has decreased. The bill would create even greater problems. His testimony is attached. EXHIBIT 13.

Sue Olsen, Musselshell County, expressed opposition to the bill.

{Tape: 5; Side: B.}

Luverne Nieskins, Daniels County Commissioner, opposed the bill.

Chip Erdman, Rural Education Association, rose in opposition to SB 421 and said there was a comprehensive system for school funding that equalized and also limited growth in school budgets. That system will continue to work. The problem with SB 421 is

that it is not integrated into that system and will put school districts in the unique position of having to vote twice on the same issues.

Cliff Roessler, Helena Public Schools, said "if it isn't broke, don't fix it." He said they must go to the voters if they have increased enrollment, inflation, and additional mandates. He urged the Committee to vote no on SB 421.

Alec Hanson, League of Cities and Towns, said that there were 60 cities and towns in Montana that had not had a tax increase since 1987 and they are operating on less money. He said he was proud of their fiscal management. EXHIBIT 14. He opposes SB 421.

Howard Gipe, Flathead County Commissioner, stood in opposition to the bill.

Gordon Kamper, Sheridan County Commissioner, said that under the bill they would have to operate on 39% fewer tax dollars and, because of that, they cannot support the bill.

Kathy Bessette, Hill County, said Hill County is able to provide services and continue operating under the restraints of I-105 but their taxable valuation has dropped from \$48 million to \$31 million and they have not levied up to the maximum. Because they have been conservative, they would be punished and for that reason cannot support the bill.

Jim Kembel, City of Billings, offered testimony on behalf of City Administrator Mark S. Watson. EXHIBIT 15.

Michael Keating, Montana School Boards Association, thanked Sen. Harp for his efforts in amending the bill so that it would be sensible and fair to local governments. However, he agreed with the testimony of Ms. Fabiano and opposes the bill.

Mary Allen, Powell County, submitted testimony in opposition to the bill on behalf of Don Valiton, Chairman, Powell County Board of Commissioners. EXHIBIT 16.

Larry Fasbender, Cascade County Coalition, said that, even though amended, there were still internal problems with the bill so he would speak in opposition.

Bill Verwolf, City of Helena, testified in opposition to the bill.

Bud Williams, Conrad School Superintendent, said he was opposed to the bill as originally written and he urged the Committee to look very closely at the amendments if they support the bill.

Gordon Morris, Montana Association of Counties, distributed copies of his prepared testimony. EXHIBIT 17.

Questions From Committee Members and Responses:

CHAIRMAN HIBBARD said that because of the constraints on time, and the necessity to hear four important bills, he postponed any questions from Committee Members until the executive session at 8:00 a.m., on April 6. He invited the sponsor and any other interested persons to attend the meeting to answer questions from Committee Members.

Closing by Sponsor:

SEN. HARP said he had closed.

HEARING ON SB 424

Opening Statement by Sponsor:

SEN. DEL GAGE, Senate District 43, Cut Bank, said SB 424 would revise the calculation of unit value for local government severance tax (LGST) purposes by excluding from the unit value calculation the net proceeds taxes on oil and natural gas that were attributable to an emergency levy imposed in fiscal year 1990 on 1988 production. He advised that a situation had arisen whereby Fallon County had received more of the local government severance tax than it should have because of an emergency levy which skewed the unit values. Because there was only so much money to be distributed, the other oil and gas counties received an inappropriate share. He distributed information on Fallon County's levied mills and an excerpt from the Fallon County Times which indicates that the county knew what it was doing and what the effect would be. EXHIBIT 18.

Proponents' Testimony:

Gloria Paladichuk, Richland Development Corp., said the Committee should look at the intent of the special legislative session in 1989 and whether the Legislature intended that one county should be a major winner and the remaining twenty counties losers. stated that following the 1989 special session, Fallon County convinced its local taxpayers to hold a special election for 15 mills which would lock them into a higher unit value, giving them a tax raise "forever" as long as there were producing wells in the county. She said the county must approve the final budget by the second Monday in August. Fallon County did not hold the election until October 3 and increased their total county mills by an average of 380%. The largest increase was the hospital She provided a handout showing budget increases fund at 878%. and other information. EXHIBIT 19. In her opinion there was no emergency in Fallon County and the emergency levy was a successful attempt to capture more of the LGST. She said many schools in the oil and gas counties have suffered because of the action of Fallon County.

Jim Halverson, Northern Gas and Coal Counties Association, said the counties have always considered the LGST distribution system as flawed. In 1989 a bill was introduced that would have done away with the unit value system and gone back to a liability system which provided that if the revenue was raised in a taxing jurisdiction, it would stay in that jurisdiction. The issue being heard is only one of a number of frustrations the counties have dealt with. He said the Association supports the bill.

Sue Olson, Musselshell County Commissioner and President of the Montana Association of Oil, Gas and Coal Counties, spoke in support of the bill. The bill does not do all they would like but it is a step in the right direction and should be passed.

Dean Harmon, Roosevelt County Commissioner, offered support for the bill.

Gordon Kamper, Sheridan County Commissioner, spoke in favor of the bill.

Kathy Bessette, Hill County Commissioner, testified in support of SB 424.

Opponents' Testimony:

Don Rieger, Fallon County Commissioner, said he had been involved in discussions of the flat tax. He said the discussion so far had made it sound like Fallon County had reaped what other counties should have received. He said there was a severe problem in Fallon County at the time the emergency levy was passed and it had been discussed with Sen. Gage at the time the bill was passed during the special session. He stressed that when HB 28 came into being, it definitely took away taxing authority. He said that at that time the county was aware that it would be the last time the producers of oil would share in the cost of building a ten-room addition to the nursing home and that was the reason the emergency levy was passed. Mr. Rieger's testimony and supporting documents, in which he defends the position of Fallon County, are attached. EXHIBIT 20. He said the county had never received a windfall and they have steadily decreased the amount of money they spend. He asked the Committee to table the bill.

{Tape: 6; Side: A.}

Questions From Committee Members and Responses:

CHAIRMAN HIBBARD asked if the sponsor had noted that the budget status update shows SB 424 as a positive impact on the general fund. SEN. GAGE said that reflected the original bill which has been amended since the status report. The bill would reduce the tax base on schools that participate. He said the status sheet was inaccurate.

HOUSE TAXATION COMMITTEE April 4, 1995 Page 24 of 25

In response to a question from REP. SWANSON, SEN. GAGE explained the LGST distribution process.

Closing by Sponsor:

SEN. GAGE emphasized that Fallon County had not done anything illegal, they were "just ahead of the rest of us and made hay while the sun shone." With passage of this bill, the "joy ride" would be over.

RECAP OF FEDERAL RETIREE LAWSUIT AND REFUND PROCESS

HISTORY

March 29, 1989	U. S. Supreme Court- <u>Davis v. Michigan</u>
* April 10, 1989	Department issues PRESS RELEASES to all media advising taxpayers to file amended returns
* July 25, 1989	Department issues 2nd PRESS RELEASE advising taxpayers to file amended returns and the abeyance process for those amended returns already received
September, 1989	Judge Sherlock orders a stay from collecting additional tax based on the Federal pensions
* October 20, 1989	Department issues 3rd PRESS RELEASE Inviting claims for all open years, advise abeyance process
July, 1990	District Court rules no refund-no retroactive application
February, 1991	District Court rules on appeal according to "Chevron Test"- no retroactive application-no refunds
* August 13, 1993	PRESS RELEASE re: Governor Racicot's determination on the 1988 tax year. Announcement stated refunds to be paid to those taxpayers that had filed returns and paid tax on the Federal pensions.
* February 24, 1994	Department issues PRESS RELEASE explaining potential settlement and advising of court hearing.
March/April, 1994	Plaintiffs' attorney, Mr. Sheehy, mails each claimant notification of potential settlement and court hearing.

* Copies of these news articles are in section marked "Press"

April 1, 1995

TO: MEMBERS OF THE HOUSE AND SENATE

FROM: PHILLIPS COUNTY COMMISSIONERS

RE: SUPPORT FOR THE FOLLOWING BILLS: HB 2, HB 389, SB 55, SB204

OPPOSITION TO THE FOLLOWING BILLS: HB 297, HB 363, HB 473,

SB 417, SB 421, SB 424

RECOMMENDATION TO KEEP TABLED: HB 309, HB 593, HB 605

RECOMMEND DO PASS ON THE FOLLOWING:

HB 2; funding MODS: The Phillips County Commissioners are in support of the amendment to HB2 which provides for the funding of MODS as proposed by the Department of Revenue. If this is not funded within the DOR budget, Phillips County will not pay for this program as we have been opposed to it from the beginning.

HB 389: We have supported this bill from the beginning, however, if any amendments not proposed by Rep. Larson are adopted, we oppose this bill. We believe this bill gives counties the opportunity to reinstate an elected assessor as well as define where the county tax records will be maintained.

SB 55: We are adamantly in support of this bill which clarifies the responsibility of the Department of Family Services for the payment of administrative costs associated with the provision of protective services. The counties cannot bear this cost!!

SB 204: This bill which clarifies existing enforcement authority under the Public Water Supply Laws sets some much needed parameters. We support this bill.

RECOMMEND DO NOT PASS ON THE FOLLOWING:

HB 297: We feel the dollars are better used where they are without the distribution change found in this bill. We believe the rural eastern counties would be short changed and the projects the DOT has scheduled for this area would not be done. The additional dollars our county would receive would not enable us to finance the needed projects.

HB 363: We adamantly oppose revising the classification,

HB 473: The proposed bill to revise the Subdivision and Platting Act has been spoken against by the counties and planners. We also oppose this bill, particularly the language found in subsection (1) found in New Section 10. If this part is not amended, kill the bill.

SB 417: We adamantly oppose this bill as it is detrimental to the counties and is dependent upon a percentage reimbursement by the state to the counties. These promises, made by the state to the counties, are never funded at the levels promised and they are only good until the legislature meets again. Do not pass this bill.

SB 421: We strongly oppose setting a new tax freeze at the 1994 levels. Phillips County is still able to maintain taxing levels at less than what was set by I 105 and this would be a detriment. We oppose SB 421.

SB 424: We are in opposition to this bill which would revise the LGST payments.

RECOMMENDATIONS TO KEEP TABLED ON THE FOLLOWING:

HB 309: We are not satisfied with the language in this bill and have requested delaying passage so as to come to an agreement with other counties and the drafters of the bill. We urge you to keep this bill tabled.

HB 593: We oppose this bill which would make many changes to the Public Service Commission. Please keep it tabled.

HB 605: We support the junk vehicle program in the state as it is now operating. We feel it provides a valuable service and is well regulated. This bill has also been tabled, please keep it there.

Please seriously consider our comments on the above legislation.

Sincerely, BOARD OF COUNTY COMMISSIONERS

Wayne Stahl, Chairman

Carol Kienenberger, Member

To:

Members of the House Taxation Committee

Montana Legislature

Re:

Senate Bill 417

Dear Committee Members,

The City of Billings desires to make the House Taxation Committee aware of the fiscal impact of upon this community. We are aware that the Committee will meet on this bill on Tuesday, April 4th. We hope you will carefully weigh the fiscal impacts that will be felt in your state's largest city.

S.B. 417 will have an overall effect of reducing taxable value in Yellowstone County by 6.41%. As we look at projections, we can anticipate an impact of \$792,570 for all Yellowstone County cities and towns when this reduction is ultimately phased out.

We want the committee to equate this reduction to actual impacts upon a city government such as Billings. Communities are dependent upon growth, so recent efforts to limit or cap growth would pose devastating impacts when accompanied with S.B. 417. Billings property taxes are capped by limited mill levies anyway, so it requires a vote of our citizens to increase taxes, such as they recently did with the City/County library for 5 additional mills.

Under S.B. 417, Billings would face an estimated reduction of \$591,700. This is broken down as follows: General Fund @ \$323,300, Transit Fund @ \$49,700, Library Fund @ \$41,200 and the Tax Increment District @ \$177,500.

These reductions equate to important services. The Library impact would equate to 1,000 books or reduced staff/hours. The General Fund represents the services of streets and public safety to our citizens. A \$323,300 reduction would equate to serious reassessments in staffing for all areas including public safety. Maintenance on city streets would be deferred. The City's Transit operations would feel impacts on bus servicing/routes which primarily serve the low income, elderly, handicapped and schoolchildren.

We request the Committee carefully consider the impact of this bill upon the residents of Billings and all residents of Montana. Due to increasing demands for public services across the state, the City of Billings would not recognize any great benefit with this bill. We urge you to consider opposing this bill.

Márk S. Watson

City Administrator, Billings

DATE 4/4/95 BB SB421

Amendments to Senate Bill No. 421 THIRD READING COPY

Amendment 1:

1. Page 7, line 26.

Insert: "(10) School district general fund budgets are subject to the voting requirements in 20-9-308. Property tax increases to fund the non-voted portion of the general fund budget as calculated in 20-9-308 are not subject to the limitations of this section."

Purpose:

This amendment makes SB 421 work with the school funding legislation enacted in 1993 (HB 667 and HB 22). Under HB667 and HB22 voter approval is required for increases in district general fund <u>budget authority</u>, regardless of the revenue source used to fund the additional budget authority.

The 1993 school legislation established minimum (BASE) and maximum budgets for school districts and limited school trustees' authority to raise budgets. All Montana school districts currently fall into one of three categories -- districts below BASE, districts between BASE and maximum, and districts above maximum. Districts below BASE are required to increase their budgets up to BASE by fiscal year 1997. Districts between BASE and maximum can only increase their budgets with a vote. Districts above maximum cannot increase their budgets and must get voter approval each year in order to stay above maximum (§ 20-9-308).

Amendment 2:

2. Page 7, line 20.

Following: "VALUATION"

Insert: "for reasons other than those cited in 15-10-412(2)"

Purpose:

To clarify that the limitation on statewide mill levy increases does not apply to expansion of the taxbase based on new construction, improvements, etc.

3. Page 5, line 25.

Following: "(i)"

Insert: "the general fund of"

Purpose:

To clarify that new subsection (i) refers to only the general fund.

FOR IMMEDIATE RELEASE

Margaret Morgan 443-4032

MONTANA REALTORS ENDORSE PROPERTY TAX CAPS

(Helena) The Montana Association of REALTORS® today announced its strong support for caps on property taxes in Montana. Ernie Dutton (Billings), the association's property tax task force chairman said the association will strongly endorse Senate Bill 421 (Harp-Kalispell) before the House Taxation Committee tomorrow (Tuesday).

Dutton said, "Senator Harp's bill will reinstate the thrust of CI-105. The Legislature eroded the impact of CI-105 in recent years." CI-105, passed by Montana voters in 1988, essentially froze property taxes.

While Senate Bill 421 freezes property taxes at the 1994 levels, the bill does allow for increases in property taxes if the increases are approved by voters. Dutton said, "the bill restricts automatic tax increases but allows local voters to choose their own level of taxation."

Dutton stated that the association supports SB 421 because the bill requires mill levies to decrease when property values increase. "In the past local and state governments have enjoyed a hidden windfall when the property values increase; no mill levy increase was needed to raise taxes." Dutton continued, "Senator Harp's bill assures that Montanans will not see automatic property tax increases just because the value of their homes and businesses increase. This is a long needed provision in Montana's tax law; we commend Senator Harp for bringing this bill forward."

Dutton noted that Montanans paid two thirds of a BILLION dollars in property taxes in 1993 (\$656,908.129.00. Montanans' property tax bills jumped over seven percent in a single year between 1993 and 1994 to \$704,098,278.00. Dutton noted that sixty one (61) percent or \$429,044,686.00 of the property tax Montanans paid in 1994 went to primary and secondary schools.

Prop	perty owners in					County paid \$	(see

Montana Fiscal Forums

Volume 2, No. 4 March, 1995

Fiscal Forum News From Ravalli and Sanders Counties

As with our other nine fiscal forums, we continue to learn new things about the special challenges facing our state's very diverse communities. Our two newest forums have just emerged from their initial, "bootcamp" sessions. Both benefited from the updated Study Kits which include the four new pieces described in this Newsletter and both enjoyed strong logistical support and endorsements from county extension agents Rob Johnson and Jon Holpop. As we learn new things we are also reminded of some common themes, e.g., that discussing fiscal matters can be educational and fun (really!).

Comparing the 1994 population estimate with the 1990 Census, Ravalli County was the fastest growing county in Montana. It grew by 5,700 residents to 30,000, or by 22.8 percent. Adding that to Missoula County's figures — 7,000 new residents — probably makes "greater Missoula" the fastest growing area of the state. No wonder growth management is a hot issue! Sanders County also grew by some 1,000 new residents to 9,700, or by approximately 12 percent.

Focus on Property Taxes

New Data, Analysis & Graphics Now Available

Fiscally speaking, 1995 is becoming the year of the property tax. Because it is far and away our most important tax — twice the personal income tax — the property tax is our tax lightening rod. Following the narrow defeat of two tax and spending constitutional initiatives, CI-66 and CI-67, there has been a burst of new analysis and presentations of how and why property taxes are evolving. Viewed from the perspective of individual communities, the differences are enormous. Here we present the highlights of these studies and how to obtain them.

1. "Why Views on Taxes Differ"

In a short piece, which has been published in a handful of newspapers, Professor Doug Young explains why individual citizens correctly have very different perceptions of what is happening to their taxes. He offers three reasons why there might be quite different views on Montana tax trends. Figure 1 below traces the background for two of these reasons. The top line, total taxes per capita from 1985 to 1993, shows a downward trend in state and local taxes. This suggests why "tax spenders" — state legislators, schools, cities, towns and county governing authorities — have felt a budget pinch. The bottom line, taxes mostly paid by individual citizens (excluding tax liabilities that are largely exported to other states) shows an upward trend for Montana's taxpayers. Higher individual income taxes, gasoline taxes, and residential property taxes have fueled this rising trend. These two

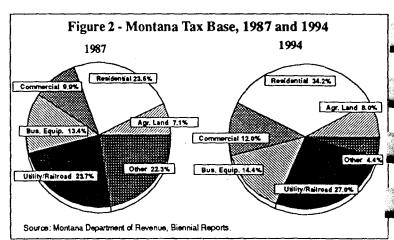

Property Tax Update (cont'd)

3. "Montana Property Taxes Since I-105"

This comprehensive analysis by Doug Young was first released as an Extension Service Bulletin and subsequently published in slightly reduced form in the Winter, 1994 *Montana Business Quarterly*. The article examines how the property tax, supposedly capped by voters in 1985, has evolved since then and why. After a short description of legislative interpretations of the I-105 initiative, he outlines what has happened to the property tax base, the mills charged against that falling base, and the resulting property taxes levied and how the taxes have been distributed among the units of local government — schools, towns, and counties. Professor Young reports that:

- In the mid- to late-1980s, the taxable value of natural resources for property tax purposes plummeted by almost \$700 million; all taxes from this sector fell by approximately \$210 million.
- Over these years residential and commercial property have become relatively and absolutely larger parts of the property tax base. (Figure 2 illustrates the fact that statewide these two classes of property went from about one-third of the 1987 tax base to nearly one-half in 1994.)
- Statewide from 1987 to 1994 mills charged against the tax base increased by 50%.
- Statewide over this period property taxes levied increased by 12 percent, from \$559 million to \$628 million (or by 21 percent to \$675 million in 1995).
- Schools received the lion's share of the increased taxes levied.
- Overall, increases in property taxes were somewhat lower than increases in income, but increases in residential property taxes were much greater 35 percent still slightly less than increases in total income 47 percent.
- And the property tax experience varied considerably from tax district to district.

So, Montana's income increased substantially in the early 1990s after a decade of near stagnation. Income growth, like population growth, was especially notable in the larger, trade and service centers and these population and income trends were mirrored in what was happening to the property tax.

News from the Forums (cont'd)

Both Ravalli and Sanders Counties have a clutch of small towns—Hamilton, Darby, Stevensville, Pinesdale and Florence in the Bitterroot Valley and Thompson Falls, Plains, Hot Springs, Noxon and Trout Creek mostly in the lower Clark Fork Valley. Both counties are also experiencing lots of subdividing and new residential construction beyond those towns.

Even by Montana standards, both are low per capita income counties. Both, formerly heavily timber dependent, are now less so and both are now increasingly dependent upon "passive income" — retirement income, Medicare payments to providers, rents, interest and profits.

And both counties are now experiencing considerable school enrollment growth, especially Ravalli County. You might guess that they would have similar tax bases. Wrong. The major sources of public revenue for their schools and local government, the property tax bases, the mills and the taxes levied could hardly be more different.

Over the period 1987 to 1994 the tax base of Sanders County shrunk by 3.5 percent while the base for Ravalli County grew by 43 percent. The composition of the two tax bases appear to be almost

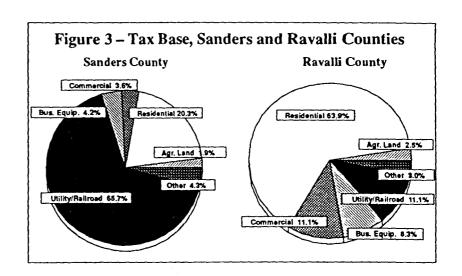

direct opposites. For Ravalli County 75 percent of the base is residential and commercial property (similar to Flathead County), while in Sanders County utilities, railroads and natural resources make up 70 percent of the base (see Figure 3, below).

Power dams, transmission lines and a railroad give Sanders County considerable "property tax wealth" — \$3,125 per person — and the absence of those types of facilities in Ravalli County makes it "property tax poor" — \$1,325 per person (see Table 2 on page 6). Homeowners and small businesses in the Bitterroot Valley carry a larger share of the property tax burden than their counterparts in Sanders County.

Is it any wonder that Ravalli County is home to some of Montana's tax revolt sentiments?

With dramatic changes underway in Ravalli and Sanders County, and the very great differences in their fiscal situations, it should be no surprise that citizen leaders are eager to review objective data and discuss current fiscal issues. Welcome aboard Sanders County and Bitterroot Fiscal Forums!

Over the period 1987 to 1994 the tax base of Sanders County shrunk by 3.5 percent while the base for Ravalli County grew by 43 percent.

Property Tax Wealth and Taxes Levied in Forum Counties (cont'd)

bases for our seven trade and service center counties versus our rural counties are as follows:

Tax Base Component	7 Trade Centers	Rural Counties
Residential and commercial prop	66%	29%
Business equipment	14%	15%
Utilities/railroads/ nat. resources	18%	43%
Agricultural land	2%	13%

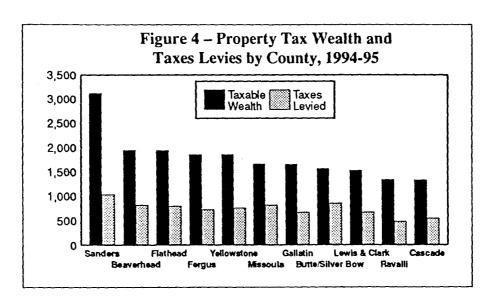

In general, homeowners and small businesses pay a much larger share of the taxes in urban centers than their counterparts in rural counties and, in general, smaller counties are "exporting" more of the property taxes levied than are their city counterparts.

So what does this all mean?

It could be argued that the ideal tax is one that Montana collects and someone else pays. Michigan taxes automobiles but most of the tax is exported along with the cars. Nevada taxes gambling, but its citizens really do not pay much of the tax. In Montana, we designed the property tax so natural resources, utilities and railroads and businesses generally would pay higher rates than would agricultural land, home owners and commercial properties.

But just as the structure of our economy is changing, so is the structure of our property tax base. In that regard, some of our rural counties seem to look more like our state's history, and some of our urban counties may look more like our future.

From the perspective of Montana's property tax base, some of our rural counties seem to look more like our history, and some of our urban counties may look more like our future.

Thanks to Ken Morrison, formerly Administrator, Property Assessment Division, Montana Department of Revenue, who developed the data for the presentations on property taxes by county.

SB421 TESTIMONY HOUSE TAXATION COMMITTEE APRIL 4, 1995

Presented by Kathy Fabiano, Office of Public Instruction

SB421 would require school districts to vote a property tax increase, if one is needed, to fund the budgets adopted in six funds - the general fund, the transportation fund, the adult basic education fund, bus depreciation fund, tuition fund and non-operating fund.

Under current law, all six of these funds are already budgeted funds, meaning there is a public process for adopting the annual budget, but with the exception of the general fund, there is no public vote on a property tax increase, if needed, to fund these budgets. Instead, these five funds are restricted in Title 20 of the code to being used for very specific and limited purposes. The transportation fund can only be used to pay costs assoc with bussing kids to and from school. The bus fund can only be used to replace district buses and two way radios. Monies in the tuition fund can only be used to pay the cost of tuition agreements between district's, etc...

Notice that SB421 doesn't amend any of the restrictions and requirements in Title 20 - so it raises alot of questions as to which section of law will govern. What happens if a district is required by Title 20 to provide transportation to a particular student or group of students, or to pay tuition under a mandatory tuition agreement, but district taxpayers won't approve the tax increase needed to fund those costs?

I am particulary concerned about the requirement that fund balances in these funds be depleted before the electorate is asked to increase property taxes. The fund balances in these funds are restricted by law and are needed for cash flow purposes. The first significant source of revenue received in a district's transportation fund is from the November property tax payments - a fund balance is needed in this fund to pay warrants written between July 1 and December 1.

Like the other five funds affected by this bill, a district's general fund is also a budgeted fund and is subject to a public process, but unlike the other five funds the general fund also has voting requirements. The 1993 L. passed HB667, which rewrote the state's method of providing equalized funding to school districts and restricted district g.f. budgets more than ever -

- minimum and maximum budget limits,
- mandatory, minimum and maximum growth limits,

Districts fall into one of three categories - below BASE, between BASE and Maximum, and above maximum.

In the 1993 SS the Legislature adopted HB22 which further restricted district general fund budgets and added strict voting requirements to the HB667 funding formula. How the voting requirements apply to a district depends on which of the three categories its budget falls into. Under HB22

- districts at or above minimum budget level must vote any increase in their general fund budget over current level.

- budget growth was limited to a max of 4%
- districts budgeting in excess of their maximum budget limit must get voter approval just to stay there.
- districts with declining enrollment must lower their budget to reflect the decline and voter approval for any increase.

Now there's SB421, which like HB22, is adding voting requirments to the HB667 funding formula. But as I said this bill doesn't amend or repeal any of the requirements in TITLE 20. It takes a different approach to limiting property tax increases than the one taken in HBs 667 and 22 - and the two approaches don't work well together.

Under 667 districts ask voters to approve <u>budget authority</u> - not the revenue needed to fund that part of the budget. This means that, when a vote is required by 667, it is required regardless of the revenue source that will be used to fund that portion of the budget. Besides property taxes, districts could be using reappropriated dollars, nonlevy revenues, or reserves to fund a voted portion of their general fund budget.

Another significant difference between 667 and this bill is the way non-levy revenues are treated. Under 667 districts are not required to vote an increase in property tax revenue when the increase is needed to replace a declining nonlevy revenue source, like Local Government Severance Taxes, or to replace a one-time-only revenue source, like cash reappropriated.

SB421 would require districts to vote all property tax increases, including increases needed only to replace a declining revenue sources and maintain the district's current spending level. This requirement of SB421 would affect different districts in different ways, depending on which nonlevy revenue sources a district receives and whether those sources net to an increase or decrease between years.

Finally, HB667 allows districts to provide property tax relief through the use of one-time revenues like tax audit receipts and protested tax settlements. Districts that provide this kind of tax relief can, without a vote, restore taxes to their previous level in the next year and maintain current spending levels.

Sb421 will likely discourage districts from providing this kind of one-time property tax relief because in the next year, the district would need to get voter approval in order to restore property taxes to their previous level. Its reasonable to expect most districts

won't take a chance on getting that approval, and will use one-time revenues for purposes other than tax relief.

As I read SB421 voters could receive two propositions at the polls in April - one required by HB667 and asking for budget authority in a district's general fund, and another required by SB421 asking for an increase property taxes to fund as many as five funds, including the general fund. Some districts will need both propositions, some will only need the one required by HB667, some will only need the one required by SB421, and other districts won't need either one.

What happens if voters approve a district's request for additional budget authority - but turn down the same district's request for an increase in property taxes? Does the district have a budget that's out of balance - budgeted expenditures but no revenues to fund them?

Or what happens if voters approve the increase in property taxes, but turn down the request for additional budget authority? Does the district go ahead and levy the taxes, even though they won't have the budget in that year to spend the additional revenue?

This bill raises a number of questions regarding the administration and application of school budgeting laws under the combination of both this bill and the provisions of Title 20. The amendment offered by Senator Harp will serve to answer a lot of those questions, so if you decide to vote for this bill I hope you will also support the amendments.

EXHIBIT 12 DATE 4/4/95 HB 58421

To: Representative Hibbard, Chairman of House Taxation Committee and all House Taxation Committee members

From: Dennis J. Parman, representing 12 North Central Montana School Districts

My testimony is in opposition to SB 421 as it exists in it's current form before the committee. We are aware that there may amendments proposed to the committee in regards to this bill, which we may contemplate giving our support, but as I will explain given the uncertain nature of many elements of this bill it may be difficult to lend complete support to some of these amendments.

We have talked asked attorneys, Certified Public Accountants, the Department of Revenue, the Office of Public Instruction, other school officials, and key Legislators (who have favored or supported this bill in the Senate) to review this bill. The net result of all of our conversations and their review has been confusion. These is no consensus among any of these people regarding a myriad of issues that we will briefly address below.

There is immense debate about whether the current language and/or amendments answer the following question "Will local voters need to vote twice to approve school General Fund budget spending and taxing authority?" (One election April 4th for budget authority and another on a different date for mill levy approval) <u>Some say yes, others say no</u>. There appears to be no way to guarantee an answer to this question before it leaves your committee or even the Legislature to ward off a legal opinion that ultimately may be needed to answer this question.

Most schools have variable sources of Non-Levy Revenue that they often have no control over. As SB 421 currently reads, there is uncertainty concerning, "If a school district has a reduction in Non-Levy Revenue do they have to ask for voter approval to replace these dollars with local property tax dollars to fill for this loss, as this would change the number of mills needed to fund this portion of a schools BASE budget?" Again there seems to be no clear answer.

Many years ago some school districts reappropriated year end fund balances to help fund the next year's budget. These districts have seen the lack of wisdom in this practice and have been scheduling the graduated depletion of these funds to protect an abrupt tax impact on local taxpayers. In applying this "graduated depletion" a district will have fewer dollars available to fund next year's budget and this will leave a revenue shortfall. The question relating to this issue is similar to that regarding Non-Levy Revenue, "If a school district has a reduction in dollars available to reappropriate do they have to ask for voter approval to replace these dollars, as it would require local property tax dollars to fill for this loss?" Uncertainty prevails again.

FROM:

Tom Cotton, Superintendent, Deer Lodge Elementary School Dist. #1

RE:

A Comparison of District Budgets -- FY 94 & 95

The following data was compiled by Dr. Jack Gilchrist of Montana State University. The data was received from the Office of Public Instruction. My comments will generalize the budgeting changes that have occurred in school districts across the State of Montana from FY 94 to FY 95.

- 1. In 1994 the average elementary per ANB was \$3,478.98 and in 1995 it is \$3,417.24.
- 2. In 1994 the average secondary spending per ANB was \$4,809.73 and in 1995 it is \$4,595.29.
- 3. In 1994 state revenue comprised 71 percent of elementary general fund sources and in 1995 this dropped to 70 percent.
- 4. In 1994 state revenue comprised 66 percent of secondary general fund sources and in 1995 this remained constant at 66 percent.
- 5. In 1994 the fund balance reappropriated in elementary was 3 percent and in 1995 it is 2 percent.
- 6. In 1994 the fund balance reappropriated in secondary was 4 percent and in 1995 it is 2 percent.
- 7. In 1994 the reliance on property taxes for the general fund in elementary was 22 percent and in 1995 it is 24 percent.
- 8. In 1994 the reliance on property taxes for the general fund at the secondary level was 24 percent and in 1995 it is 26 percent.
- 9. The non-levy revenue remained constant from 94-95.
- 10. The disparity ratio between the 95th and 5th percentile still does not meet the equity test in any category by size.

In general the lack of increased participation by the stated has led to a greater reliance on property taxes while per pupil expenditures has dropped. It would also appear that districts have fewer dollars available to cash reappropriate. The disparity ratios still do not meet the accepted differential of 1 to 1.25 in any category.

Montana Legislature

Re:

S.B. 421 - Property Tax Limitations

Dear Committee Members:

The City of Billings wishes to respond to S.B. 421 as is presently proposed to the House Taxation committee. Since this bill affects the spreading of property tax to the taxpayers of Billings, we feel compelled to respond.

Cities in Montana, including Billings, are reliant upon property tax. The City of Billings is limited by its citizenry to 69.5 mills as stipulated by City Charter. The City is at its limit and has been able to manage its government through innovation and solid public management. Growth is a significant factor that has allowed the City of Billings to maintain its services.

S.B. 421 essentially freezes all existing properties at 1994 levels. The future of our city must now be entirely dependent upon growth, new construction, annexation or expansions. Unfortunately, this bill will discourage growth through financial limitations. Motivation to purchase new homes will be limited due to growing tax differentials. Homes that are sold will be at 1994 taxable values instead of new purchase prices. As noted in a recent article about the Proposition 13 debacle in California, wider and wider tax discrepancies developed until million dollar homes of the same age and size were sitting next to hundred thousand dollar homes.

The state of Montana and the City of Billings does not need the provisions of S.B. 421 to create taxation differences within our community. The Governors Task Force recently submitted that more local government options were needed, not less. This bill takes away the ability of Billings and other Montana cities to provide services to growing cities.

The City of Billings urges the Committee to reject this bill and its harmful provisions.

Respectfully Submitted,

Mark S. Watson

City Administrator

DEER LODGE, MONT.

Re: Senate Bill 421 by Senator Harp et al

If we correctly understand the effect of this bill, we are deeply concerned, and would have to oppose its passage. Perhaps it could be amended to solve our problem with it.

We are one of the eight of nine so-called "BPA Counties". The Bonneville Power lines went through these counties. A "Beneficial Use Tax" was enacted by the state legislature to compensate the counties for the loss of tax revenues, and the lines been owned by a private utility, such as Montana Power Company.

For several years, BPA paid these taxes under protest, and the matter was thrashed out in courts, including the U.S. Supreme Court. It was settled in our favor. The "BPA Counties" received substantial sums of money, which had been tied up under protest. We received a total of \$1,245,000. A considerable portion of our share, we used to reduce taxes in the years 1992-93 and 1993-94.

For example, we notified our taxpayers as follows:

Powell County Commissioners, in approving the 1992-93

county budget, announced that county taxpayers would

see their countywide taxes reduced for that period by

approximately 17.2%. Commission Chairman Don Valiton

said, "This taxpayer dividend is the result of protested

taxes being released under the beneficial use tax on power

passed through the Bonneville Power lines in our county,

and which have been tied up in court actions for several

years. Some additional funds from this source will be

available for the 1993-94 tax year, and a continuation of

some tax reduction may be possible then...the tax reduc
tion is good for only two years, and we will then face the

unenviable task of again bringing taxes back to the 1991
92 level".

A year later, in our "tax letter" sent to every taxpayer we said

Gordon Morris, Executive Director

RE:

SB 421

DATE:

April 3, 1995

In the interest of your time I am submitting written comments in <u>opposition</u> to SB 421.

From every perspective Initiative measure No. 105 has worked and is working. Actions by previous legislatures have weakened the initiative by such actions as amending out schools. Nevertheless, local governments are dealing with I-105 and are not nor have they ever taken advantage of "windfalls" associated with cyclical reappraisal. I believe the enclosed attachment "MACo I-105 Analysis/Senate Bill 421" clearly demonstrates this fact.

Looking at the worst case scenario from that analysis Fallon county's taxable value of \$129,369 in 1986 resulted in \$2,249,726 in county taxes. This compares to approximately \$608,696 in taxes in 1994. Even when this is adjusted for non-tax revenues, Local Government Severance tax, and personal property tax reimbursements, the county is not keeping pace with inflaction.

Looking at the sponsor's county--Flathead--in FY '87, \$9,318,000 was generated in property taxes compared to \$12,418,000 in FY '95. Adjusted for inflation the FY '87 requirements would be approximately \$13,145,000. This does not constitute a windfall.

Apart from these facts, the legislation is full of contradictions. As an example, the fiscal note in Assumption 4 states that "taxes levied are allowed to increase due to annexation", etc., however, on page 3, lines 2 through 6, this section clearly implies that a taxing unit shall adjust mill levies downward to compensate for any increase in taxable valuation. The language, beginning on line 5 is not a stated exception. This is a major flaw in the bill.

From a county perspective, I would note the following:

1) the elimination of cyclical reappraisal on line 16, page 3, amounts to a cap on class 4 property values <u>inside a cap</u> on tax increases on all property. This will result in another shift of taxes over time from real to personal property.

EXCERPTS FROM FALLON COUNTY TIMES 1989......

-The commissioners have pointed out that this is a one-time only request and will not be repeated on a yearly basis.
-The park and recreation budget (including the golf course) will be totally eliminated.
- They are quick to point out that this is a one-time action, but its effects are long-term. A formula will be determined by the 1989-90 county budget to decide the percentage of net proceed taxes the county will receive in future years.
-However, bear in mind that if this levy does not pass, the construction of additional rooms will not be carried out. In the future, the county would have to run a bond issue in order to finance new construction.
-Q: Why can't we wait until next year for this special tax increase?
- A: After this fiscal year, the formula for the distribution of gross proceeds will be based on the 1989-90 budget.
- The benefits to the county will be numerous. The nursing home will have a ten room addition, and the necessary renovations on the lab at the hospital can be made.
-But most importantly, taxpayers secured a larger percentage of the gross proceeds taxes for at least the next two years.
