24

25

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF MONTANA:

Section 1. Short title. This act may be cited as the "Montana Solar Tax Credit Act of 1983".

Section 2. Definitions. As used in [this act], unless the context requires otherwise, the following definitions apply:

- (1) "Active thermal system" means a system that uses solar devices thermally isolated from the living or commercial space to provide for collection, storage, or distribution of solar energy for heating, cooling, hot water, or electricity.
- (2) "Dwelling" means a building or portion thereof used for residential purposes and includes single-family residences, mobile homes, and the individual units of condominiums, cooperatives, apartment buildings, or other similar multiple dwellings.

- (3) "Energy conservation measures" includes but is not limited to load management devices, flue dampers, efficiency increasing devices, insulation above standards set by building codes, water heating insulation jackets, water heater and distribution system timing devices, and shower and faucet flow-reducing devices.
- 7 (4) "Installed" means placed in position in a 8 functionally operative state.
- 9 (5) "Owner" includes a recorded holder of legal title. a lessee with at least 3 years remaining on his lease, the 10 11 holder of a recorded easement, a person purchasing premises 12 under a contract of sale or who holds shares or membership in a cooperative housing corporation, which holding is a 13 requisite to the exclusive right of occupancy to the 14 15 premises, or a person who is a member of a nonprofit corporation or association that is a recorded holder of 16 17 legal title.
  - (6) "Passive thermal system" means a system that uses the structural elements of the building, not augmented by mechanical components, to provide for collection, storage, or distribution of solar energy for heating or cooling in residential and commercial applications.
- 23 (7) "Premises" means the principal stationary location
  24 in Montana where the system is installed for direct use or
  25 for purposes of sale of energy and includes land, easements,

INTRODUCED BILL

- buildings or portions thereof such as roofs, and mobile
- (8) "Semipassive thermal system" means a system that uses the structure of a building, augmented by mechanical components, to provide for collection, storage, or distribution of solar energy for heating or cooling in residential and commercial applications.
- (9) "Solar device" means the equipment associated with the collection, conversion, transfer, distribution, storage, or control of solar energy. In the case of a solar device associated with two or more solar energy systems, the credit allowed for the solar device may be taken for any one of the systems or divided equally among them.
- (10) "Solar energy system" means the use of solar devices, including but not limited to passive thermal systems, semipassive thermal systems, active thermal systems, photovoltaic systems, and wind-driven systems, with a useful life of at least 3 years and used for the direct production of energy for resale or use and for the individual functions of:
- (a) domestic, recreational, therapeutic, or service
- 23 (b) space conditioning;

- 24 (c) production of electricity;
- 25 (d) process heat, including distillation;

(e) solar mechanical energy; or

2 (f) wind energy for the production of electricity or 3 mechanical work.

Section 3. Tax credit for solar system — dwellings. The owner of a dwelling located in Montana on which a solar energy system is installed may claim a tax credit in an amount equal to 60% of the eligible costs incurred, to be taken against the tax liability imposed upon the owner pursuant to Title 15, chapter 30 or 31.

Section 4. Eligible costs. (1) For the purposes of determining the amount of the tax credit that may be claimed pursuant to [section 3 or 5], eligible costs include purchase costs, installation charges, monthly lease payments, and the compensation paid to the owner of burdened property in connection with the acquisition of a solar easement as provided for in Title 70, chapter 17, part 3. Energy conservation measures applied in conjunction with solar energy systems to reduce the total cost or backup energy requirements of such systems are considered part of the systems and are eligible costs. Interest charges are not eligible costs.

(2) The eligible costs of any solar energy system eligible for the credit provided under this section must be reduced by any grant provided by a state or federal agency for such a system.

Section 5. Tax credit for solar system — premises other than dwellings. The owner of premises other than a dwelling, located in Montana, on which a solar energy system is installed may claim a tax credit in an amount equal to 25% of the eligible costs incurred, to be taken against the tax liability imposed upon the owner pursuant to Title 15, chapter 30 or 31.

Section 6. Limitation on credit. (1) To the extent that the federal energy tax credit for costs incurred by a taxpayer for the purchase and installation of a solar energy system is allowed or allowable. the state tax credit provided for in [section 3 or 5] must be reduced by the amount of any federal credit so that the effective credit for any taxable year does not exceed 60% of eligible costs.

(2) The total amount of credit available to any taxpayer may not exceed \$3,000 per solar energy system.

Section 7. Carryover of credit. The tax credit allowed under [section 3 or 5] is to be deducted from the taxpayer's income tax liability for the taxable year in which the system invested in by the taxpayer is installed. If the amount of the tax credit exceeds the taxpayer's income tax liability for the taxable year, the amount that exceeds the tax liability may be carried over for credit against the taxpayer's income tax liability in the next succeeding taxable year or years until the total amount of the tax

credit has been deducted from tax liability. However, no tax credit may be carried over for deduction after the fourth taxable year succeeding the taxable year in which the system was installed.

Section 8. Apportionment of credit. If a solar energy system serves two or more dwellings, the owner or owners of the system are eligible for the tax credit provided in [section 3] in proportion to the number of dwellings served. The amount of the credit must be determined by dividing the eligible costs of the system by the number of dwellings served.

Section 9. Special provision for owner-builders. The owner-builder or owner-developer of a new home may elect not to claim the solar energy tax credit for any or all systems installed on a new home. If an owner-builder or owner-developer irrevocably elects not to claim the tax credit provided for in [section 3], the original purchaser of the new home on which the system is installed may claim the credit. In claiming the credit, the purchaser shall confirm the election by a written document signed by the owner-builder or owner-developer.

Section 10. Leased solar energy systems. Taxpayers who lease a solar energy system are eligible for the tax credit provided in {section 3 or 5}. In any year, the credit applies only to the principal recovery portion of lease

- 1 payments made during that year and to amounts expended on a
- 2 portion of the system purchased under the lease agreement
- 3 during that year. As used in this section, "principal
- 4 recovery portion" means the cost incurred by the lessor in
- 5 acquiring the solar energy system, including equipment and
- installation costs in a purchase agreement or promissory
- 7 note, but does not include interest charges or maintenance
- 8 expenses.

- 9 Section 11. Rulemaking. The department of natural
- 10 resources and conservation shall establish guidelines and
  - criteria for solar energy systems that are eligible for the
- 12 tax credit provided by [section 3 or 5]. Such guidelines
- 13 and criteria are limited to minimum standards for the
- 14 safety, reliability, and durability of solar energy systems.
- 15 Section 12. Repealer. Sections 15-32-201 through
- 16 15-32-203, MCA, are repealed.

#### STATE OF MONTANA

REQUEST NO. 244-83

#### FISCAL NOTE

Form BD 15

compliance with a written request received January 26, , 19 83 , there is hereby submitted a Fisc	
Senate Bill 283 pursuant to Chapter 53, Laws of Montana, 1965 · Thirty-Ninth Legislative Assemb	οlγ.
ackground information used in developing this Fiscal Note is available from the Office of Budget and Program Planning, to i	nembers
tithe Legislature upon request.	

#### DESCRIPTION OF PROPOSED LEGISLATION:

Senate Bill 283 provides a tax credit for the installation of solar energy systems in Montana; defines such systems; and provides rulemaking authority to establish criteria for such systems.

## ASSUMPTIONS:

- 1) An engineer (grade 15, step 2) will be required for one year to reveiw existing standards and develop standards for Montana.
- 2) Safety standards will be covered by building codes.

# FISCAL IMPACT:

Lower bound estimates of the reduction of individual income tax collections are \$496,000 and \$592,000 for fiscal years 1984 and 1985, respectively. These estimates are based on the amount of credits likely to be produced by the continuation of the existing alternative energy credit. However, the bill would greatly liberalize the credit by increasing the credit rates, increasing the maximum credit, and increasing the types of investments which would qualify. All of these factors will lead to a greater decline in revenues.

No estimate of the reduction in corporate license tax collections is possible since no data is available.

Expenditures	FY 84	FY 85
Personal Services:		
Salary	\$ 21,872	\$ -0-
Benefits (@ 20%)	4,374	-0-
Total	\$ 26,246	\$ -0-

Continued

BUDGET DIRECTOR

Office of Budget and Program Planning

Date: 1 - 31 - 83

## LONG-RANGE EFFECTS OF PROPOSED LEGISLATION:

Since the proposed state credit is tied to the federal credit, the revenue impact will be greatly increased when and if the federal credit is reduced or eliminated. The elimination of the federal credit, for example, would increase to state credit from 20% to 60%, leading to a greater impact on individual income tax collections.

# TECHNICAL OR MECHANICAL DEFECTS OR CONFLICTS WITH EXISTING LEGISLATION:

- 1) The proposal extends credits to more types of investments than the federal government allows. Hence, the credit rate for the investments not allowed by the IRS will be 60% not 20%.
- 2) Section 4 includes energy conservation measures in eligible costs of the system. This could be construed to include conservation measures applied to the dwelling, not just the alternative energy system. In this case, the credit rate will be 45% for this portion of the investment, which would conflict with the existing energy conservation credit and possibly lead to two credits being claimed on the same investment.
- 3) The Department of Natural Resources and Conservation may not be able to develop reliability standards for passive solar systems, because passive solar systems must be an integral part of a structure and each structure tends to be different.

13	Section 1. Short title. This act may be cited as the
14	"Montana Solar Tax Credit Act of 1983".
15	Section 2. Definitions. As used in [this act], unless
16	the context requires otherwise, the following definitions
17	apply:
18	(1) #Active thermal system# means a system that uses
19	solar devices thermally isolated from the living or
20	commercial space to provide for collection, storage, or
21	distribution of solar energy for heating, cooling, hot
22	water, or electricity.
23	(2) "Dwelling" means a building or portion thereof
24	used for residential purposes and includes single-family
25	residences, mobile homes, and the individual units of

- condominiums, cooperatives, apartment buildings, or other similar multiple dwellings.
- (3) "Energy conservation measures" includes but is not limited to load management devices, flue dampers, efficiency increasing devices, insulation above standards set by building codes, water heating insulation jackets, water heater and distribution system timing devices, and shower and faucet flow-reducing devices.
- 9 (4) "Installed" means placed in position in a 10 functionally operative state.
- 11 (5) "Owner" includes a recorded holder of legal title. a lessee with at least 3 years remaining on his lease, the 12 holder of a recorded easement, a person purchasing premises 13 under a contract of sale or who holds shares or membership 14 15 in a Cooperative housing corporation, which holding is a 16 requisite to the exclusive right of occupancy to the 17 premises, or a person who is a member of a nonprofit corporation or association that is a recorded holder of 18 19 legal title.
- 20 [6] "Passive thermal system" means a system that uses
  21 the structural elements of the building, not augmented by
  22 mechanical components, to provide for collection, storage,
  23 or distribution of solar energy for heating or cooling in
- co of distribution of solar energy for heating or cooling in
- 24 residential and commercial applications.
- 25 (7) "Premises" means the principal stationary location

- 1 in Montana where the system is installed for direct use or 2 for purposes of sale of energy and includes land, easements. buildings or portions thereof such as roofs, and mobile
- 3 homes.
- 5 (8) "Semipassive thermal system" means a system that uses the structure of a building, augmented by mechanical 7 components, to provide for collection, storage. 8 distribution of solar energy for heating or cooling in

residential and commercial applications.

- 10 (9) "Solar device" means the equipment associated with 11 the collection, conversion, transfer, distribution, storage, 12 or control of solar energy. In the case of a solar device 13 associated with two or more solar energy systems, the credit 14 allowed for the solar device may be taken for any one of the 15 systems or divided equally among them.
  - (10) "Solar energy system" means the use of solar devices, including but not limited to passive thermal systems, semipassive thermal systems, active thermal systems, photovoltaic systems, and wind-driven systems, with a useful life of at least 3 years and used for the direct production of energy for resale or use and for the individual functions of:

- Section 5. Tax credit for solar system premises other than dwellings. The owner of premises other than a dwelling. located in Montana, on which a solar energy system is installed may claim a tax credit in an amount equal to 25% of the eligible costs incurred, to be taken against the tax liability imposed upon the owner pursuant to Title 15, chapter 30 or 31.
- Section 6. Limitation on credit. (1) To the extent that the federal energy tax credit for costs incurred by a taxpayer for the purchase and installation of a solar energy system is allowed or allowable, the state tax credit provided for in [section 3 or 5] must be reduced by the amount of any federal credit so that the effective credit for any taxable year does not exceed 60% of eligible costs.
- 23 (2) The total amount of credit available to any
  24 taxpayer may not exceed \$3,000 per solar energy
  25 system.

1 Section 7. Carryover of credit. The tax credit allowed under [section 3 or 5] is to be deducted from the taxpayer's 3 income tax liability for the taxable year in which the system invested in by the taxpayer is installed. If the amount of the tax credit exceeds the taxpayer's income tax liability for the taxable year, the amount that exceeds the 7 tax liability may be carried over for credit against the taxpayer's income tax liability in the next succeeding 9 taxable year or years until the total amount of the tax credit has been deducted from tax liability. However, no 10 11 tax credit may be carried over for deduction after the 12 fourth taxable year succeeding the taxable year in which the 13 system was installed.

Section 8. Apportionment of credit. If a solar energy system serves two or more dwellings, the owner or owners of the system are eligible for the tax credit provided in [section 3] in proportion to the number of dwellings served. The amount of the credit must be determined by dividing the eligible costs of the system by the number of dwellings served.

Section 6. Limitation on credit. (1) To the extent that the federal energy tax credit for costs incurred by a taxpayer for the purchase and installation of a solar energy system is allowed or allowable, the state tax credit provided for in [section 3 or 5] must be reduced by the amount of any federal credit so that the effective credit for any taxable year does not exceed 60% of eligible costs.

taxpayer may not exceed \$3,000 per solar energy

-5-

- 1 Saction 7. Carryover of credit. The tax credit allowed 2 under [section 3 or 5] is to be deducted from the taxpayer's 3 income tax liability for the taxable year in which the system invested in by the taxpayer is installed. If the amount of the tax credit exceeds the taxpayer's income tax liability for the taxable year, the amount that exceeds the tax liability may be carried over for credit against the 7 taxpayer's income tax liability in the next succeeding taxable year or years until the total amount of the tax credit has been deducted from tax liability. However, no 10 11 tax credit may be carried over for deduction after the fourth taxable year succeeding the taxable year in which the 12 13 system was installed.
  - Section 8. Apportionment of credit. If a solar energy system serves two or more dwellings, the owner or owners of the system are eligible for the tax credit provided in [section 3] in proportion to the number of dwellings served. The amount of the credit must be determined by dividing the eligible costs of the system by the number of dwellings served.

8	SYSTEM: THE PURCHASER MUST REDUCE THE STATE TAX CREDIT
9	PROVIDED IN LSECTION 31 SO THAT THE EFFECTIVE CREDIT FOR ANY
10	TAXABLE YEAR DOES NOT EXCEED 203 OF ELIGIBLE COSTS.

 Section 10. Leased solar energy systems. Taxpayers who lease a solar energy system are eligible for the tax credit provided in [section 3 or 5]. In any year, the credit applies only to the principal recovery portion of lease payments made during that year and to amounts expended on a portion of the system purchased under the lease agreement during that year. As used in this section, "principal recovery portion" means the cost incurred by the lessor in acquiring the solar energy system, including equipment and installation costs in a purchase agreement or promissory note, but does not include interest charges or maintenance expenses.

L	STATEMENT OF INTENT
!	SENATE BILL 283

A statement of intent is required for this bill because it grants rulemaking authority to the Department of Revenue in Section 11, to establish criteria and guidelines for the safety, reliability, and durability of solar energy systems. The Legislature intends that these criteria address such issues as:

- 10 (1) systems meeting federal safety standards;
- 11 (Z) warranties on systems; and
- 12 (3) the life expectancies of systems.

2	INTRODUCED BY FULLER.
3	HALLIGAN, CHRISTIAENS
4	
5	A BILL FOR AN ACT ENTITLED: "AN ACT PROVIDING A TAX CREDIT
6	FOR THE INSTALLATION OF SOLAR ENERGY SYSTEMS IN MONTANA;
7	DEFINING SUCH SYSTEMS; AND PROVIDING RULEMAKING AUTHORITY TO
8	ESTABLISH CRITERIA FOR SUCH SYSTEMS; REPEALING SECTIONS
9	15-32-201 THROUGH 15-32-203+ MCA: AND PROVIDING AN
10	APPLICABILITY DATE."
11	
12	BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF MONTANA:
13	Section 1. Short title. This act may be cited as the
14	"Montana Solar Tax Credit Act of 1983".
15	Section 2. Definitions. As used in [this act], unless
16	the context requires otherwise, the following definitions
17	apply:
10	(1) "Active thermal system" means a system that uses
19	solar devices thermally isolated from the living or
20	commercial space to provide for collection, storage, or
21	distribution of solar energy for heating, cooling, hot
22	water, or electricity.
23	(2) "Dwelling" means a building or portion thereof
24	used for residential purposes and includes single-family
25	residences, mobile homes, and the individual units of

SENATE BILL NO. 283

- 1 condominiums, cooperatives, apartment buildings, or other 2 similar multiple dwellings.
- 3 (3) "Energy conservation measures" includes but is not limited to load management devices, flue dampers, efficiency increasing devices, insulation above standards set by building codes, water heating insulation lackets, water heater and distribution system timing devices, and shower and faucet flow-reducing devices.
- (4) "Installed" means placed in position in a 9 10 functionally operative state.
- 11 (5) "Owner" includes a recorded holder of legal title: 12 a lessee with at least 3 years remaining on his lease, the 13 holder of a recorded easement, a person purchasing premises 14 under a contract of sale or who holds shares or membership in a cooperative housing corporation, which holding is a requisite to the exclusive right of occupancy to the premises, or a person who is a member of a nonprofit corporation or association that is a recorded holder of legal title.

15

17

18

19

20

21

22

23

24

- (6) "Passive thermal system" means a system that uses the structural elements of the building, not augmented by mechanical components, to provide for collection, storage, or distribution of solar energy for heating or cooling in residential and commercial applications.
  - (1) "Premises" means the principal stationary location

SB 0283/02

- in Montana where the system is installed for direct use or for purposes of sale of energy and includes land, easements, buildings or portions thereof such as roofs, and mobile homes.
  - (8) "Semipassive thermal system" means a system that uses the structure of a building, augmented by mechanical components, to provide for collection, storage, or distribution of solar energy for heating or cooling in residential and commercial applications.
  - (9) "Solar device" means the equipment associated with the collection, conversion, transfer, distribution, storage, or control of solar energy. In the case of a solar device associated with two or more solar energy systems, the credit allowed for the solar device may be taken for any one of the systems or divided equally among them.
  - (10) "Solar energy system" means the use of solar devices, including but not limited to passive thermal systems, semipassive thermal systems, active thermal systems, photovoltaic systems, and wind-driven systems, with a useful life of at least 3 years and used for the direct production of energy for resale or use and for the individual functions of:
- (a) domestic, recreational, therapeutic, or service
  water heating:
  - (b) space conditioning:

18

19

20

21

22

23

24

25

(f) wind energy for the production of electricity or mechanical work.

Section 3. Tax credit for solar system -- dwellings. 7 The owner of a dwelling located in Montana on which a solar energy system is installed may claim a tax credit in an amount equal to 60% 20% of the eligible costs incurred, to 9 be taken against the tax liability imposed upon the owner 10 pursuant to Title 15, chapter 30 or 31, IE THE SOLAR ENERGY 11 12 SYSTEM IS OWNED BY MORE THAN ONE PERSON OR CORPORATIONA NO MORE THAN AN AGGREGATE OF 201 OF THE ELIGIBLE COSTS MAY BE 13 CLAIMED AS A CREDIT BY ALL OWNERS OF THE SOLAR ENERGY 14 SYSIEM. 15

Section 4. Eligible costs. (1) For the purposes of determining the amount of the tax credit that may be claimed pursuant to [section 3 or 5], eligible costs include purchase costs, installation charges, monthly lease payments, and the compensation paid to the owner of burdened property in connection with the acquisition of a solar easement as provided for in Title TO, chapter 17, part 3. Energy conservation measures applied in conjunction with solar energy systems to reduce the total cost or backup energy requirements of such systems are considered part of

the systems and are eligible costs. HOWEVER. IE A CREDIT IS

CLAIMED FOR ENERGY CONSERVATION MEASURES UNDER [THIS ACI].

II MAY MOT ALSO BE CLAIMED UNDER TITLE 15. CHAPTER 32. PART

1. Interest charges are not eligible costs.

- (2) The eligible costs of any solar energy system eligible for the credit provided under this section must be reduced by any grant provided by a state or federal agency for such a system.
- Section 5. Tax credit for solar system -- premises other than dwellings. The owner of premises other than a dwelling, located in Montana, on which a solar energy system is installed may claim a tax credit in an amount equal to 25% of the eligible costs incurred, to be taken against the tax liability imposed upon the owner pursuant to Title 15, chapter 30 or 31.
- Section 6. Limitation on credit. (1) To the extent that the federal energy tax credit for costs incurred by a taxpayer for the purchase and installation of a solar energy system is allowed or allowable, the state tax credit provided for in [section 3 or 5] must be reduced by the amount of any federal credit so that the effective credit for any taxable year does not exceed 60% of eligible costs.
- (2) The total amount of credit available to any taxpayer may not exceed \$3,000 per solar energy system.

-5-

Section 7. Carryover of credit. The tax credit allowed under [section 3 or 5] is to be deducted from the taxpaver's income tax liability for the taxable year in which the system invested in by the taxpayer is installed. If the amount of the tax credit exceeds the taxpayer's income tax liability for the taxable year, the amount that exceeds the tax liability may be carried over for credit against the taxpaver's income tax liability in the next succeeding taxable year or years until the total amount of the tax credit has been deducted from tax liability. However, no tax credit may be carried over for deduction after the fourth taxable year succeeding the taxable year in which the system was installed.

Section 8. Apportionment of credit. If a solar energy system serves two or more dwellings, the owner or owners of the system are eligible for the tax credit provided in [section 3] in proportion to the number of dwellings served. The amount of the credit must be determined by dividing the eligible costs of the system by the number of dwellings served.

Section 9. Special provision for owner-builders. The owner-builder or owner-developer of a new home may elect not to claim the solar energy tax credit for any or all systems installed on a new home. If an owner-builder or owner-developer irrevocably elects not to claim the tax

1	credit provided for in [section 3], the original purchaser
2	of the new home on which the system is installed may claim
3	the credit. In claiming the credit, the purchaser shall
4	confirm the election by a written document signed by the
5	owner-builder or owner-developer. IE IHE QUNER-DEVELOPER
6	ELECTS TO FOREGO THE CREDIT PROVIDED FOR IN LISECTION 31. BUT
7	CLAIMS A FEDERAL ENERGY TAK CREDIT FOR THE SOLAR ENERGY
8	SYSTEM: THE PURCHASER MUST REDUCE THE STATE TAX CREDIT
9	PROVIDED IN [SECTION 3] SO THAT THE EFFECTIVE CREDIT FOR ANY
LO	TAXABLE YEAR DOES NOT EXCEED 202 OF ELIGIBLE COSIS.
