Section 3. Administrative expenses for resource indemnity trust grants program. If enabling legislation for a resource indemnity trust grants program is passed by the

1987 legislature or if further projects are funded under this bill, there is appropriated \$90,000 from the interest income of the resource indemnity trust fund to the department of natural resources and conservation for administrative expenses, including but not limited to the salaries and expenses of personnel, equipment, office space, and other expenses necessarily incurred in the administration of the grants program. If no enabling legislation is passed or if no further projects are approved by the 1987 legislature, there is appropriated \$70,000 from the interest income of the resource indemnity trust fund to the department of natural resources and conservation for the described administrative expenses. These funds will be used for administration of the 21 current grants that will be active under this program during fiscal years 1988 and 1989. Any other funds appropriated by the legislature for the administration of the resource indemnity trust grants program must reduce this appropriation in order not to exceed the amounts noted here.

Section 4. Reauthorization of grant. A grant to the department of health and environmental sciences from the interest income of the resource indemnity trust fund for the development of a hazardous waste management collection and transfer project authorized by the 1985 legislature in House Bill No. 922 in the amount of \$632,313 is reauthorized.

1 Section 5. Coordination of fund sources for grants  
 2 program projects. A sponsor of a grants program project who  
 3 has applied for a grant for that project under both the  
 4 resource indemnity trust grants program and the water  
 5 development program or the renewable resource development  
 6 program may not receive duplicative funding.

7 Section 6. Conditions of grants. Disbursement of grant  
 8 funds under this act is subject to the following conditions  
 9 that must be met by the project sponsor:

10 (1) A scope of work and budget for the project must be  
 11 approved by the department of natural resources and  
 12 conservation. Reduction in a scope of work or budget may not  
 13 affect priority activities or improvements.

14 (2) Other funds required for project completion must  
 15 have been committed, and the commitment must be documented.

16 (3) A project sponsor shall show satisfactory  
 17 completion of conditions described in the recommendations  
 18 section of the project narrative of the resource indemnity  
 19 trust grants program report for the 1988-89 biennium.

20 (4) An agreement between the department of natural  
 21 resources and conservation and the grant applicant must be  
 22 executed in a timely manner, taking into consideration any  
 23 changed conditions or circumstances that govern the  
 24 administration and disbursement of funds.

25 (5) Any other specific requirements must be

1 accomplished as considered necessary by the department of  
 2 natural resources and conservation to accomplish the purpose  
 3 of the grant as evidenced from the application to the  
 4 department of natural resources and conservation or as  
 5 defined by the legislature.

6 Section 7. Reversion of funds. All funds allocated to  
 7 the grant program special revenue account under this act  
 8 that are unspent and unencumbered on June 30, 1989, revert  
 9 to the grant program special revenue account created in  
 10 75-1-1102.

11 Section 8. Severability. If a part of this act is  
 12 invalid, all valid parts that are severable from the invalid  
 13 part remain in effect. If a part of this act is invalid in  
 14 one or more of its applications, the part remains in effect  
 15 in all valid applications that are severable from the  
 16 invalid applications.
